

Ladies and Gentlemen,

Distinguished guests from Qatar and around the world,

Welcome to this Data Forum dedicated to fostering inclusive data ecosystems and enhancing effective decision-making. I am Ahmad Hussein honored to organize this event and passionate about the transformative power of data.

In today's rapidly evolving digital landscape, data has become the lifeblood of innovation and progress. Whether you're a seasoned data professional, a business leader, or just beginning your journey into the world of data, this forum is designed to be a nexus where ideas, expertise, and experiences converge.

The primary goal is to champion inclusivity within data ecosystems. We aim to create a space where diverse perspectives, backgrounds, and skill sets are not only acknowledged but celebrated. Inclusive data ecosystems are essential for building robust and well-rounded datasets, ensuring that the insights drawn are representative of the world we live in.

Furthermore, effective decision-making lies at the heart of every successful organization. By bringing together experts and enthusiasts from various domains, we aspire to explore how data can be harnessed to make informed decisions that drive positive impact.

Whether you're interested in data governance, analytics, machine learning, or the ethical implications of data usage, this forum has something for everyone. Throughout the event, we'll delve into cutting-edge trends, share best practices, and engage in thought-provoking discussions.

The aim is not just to impart knowledge but to spark collaborations and connections that will fuel the growth of each participant and contribute to the advancement of the data community.

So, I urge each of you to actively engage, ask questions, and contribute your unique perspectives. Together, let's build a data community that is inclusive, innovative, and committed to driving positive change through the power of information.

Thank you for being a part of this exciting journey. I look forward to the inspiring conversations and collaborations that will unfold over the course of this Data Forum.

Our data forum consists of 10 sessions scheduled for October 29 and 30, 2023. In the last session, I am going to introduce to you the Doha Declaration for your review and endorsement

Welcome again, and we are honored to have you in Doha.
