PREFACE

Marriage & Divorce statistics are considered one of the cornerstones of vital statistics that are used as a significant element when making decisions to achieve the goals of Qatar's Second National Development Strategy (2018-2022). These goals include building a secure and stable society under the umbrella of effective government and family institutions, and setting policies and programs that promote family cohesion. Indicators derived from these data reveal all the aspects surrounding marriage and divorce which have gained great attention in the field of population and social studies.

In general, the society's demographical behavior can be identified through statistical analysis of marriage and divorce. Besides, the indicators furnished by the marriage & divorce statistics are used as milestones for attaining short and long term goals and for improving the social and economic conditions of all society members in Qatar.

This report clarifies the development of marriage and divorce and their various components, such as marriage and divorce rates, average age at first marriage as well as the characteristics of marriage and divorce during 2019, in a bid to identify the factors that delay or encourage marriage and the factors that impact divorce rates as well as their repercussions on family cohesion.

The Planning and Statistics Authority (PSA) hopes that the government agencies, private institutions of public interest and civil society organizations will all benefit from this report's indicators of marriage & divorce in 2019, to develop social plans and policies that encourage the youth to marry, and eliminate the spread of divorce, as well as find effective solutions, especially among the youth age groups.

Dr. Saleh M. Al-Nabit
President of Planning & Statistics Authority

INTRODUCTION

Marriage & Divorce statistics are one of the most vital statistics through which the characteristics of marriage and divorce are studied to determine the family characteristics in the State of Qatar and the society's pathways for population growth-related issues.

This report aims at identifying the evolution of cases of marriage and divorce in the State of Qatar in 2019. The first section deals with the topic of marriage. It contains data and indicators, such as the average age at first marriage and general marriage rate. It also contains data on marriage characteristics in the Qatari society through indicators of first marriage and age groups and educational levels of spouses.

The second section of this report focuses on divorce in Qatari society. It comprises analysis of data on divorce, such as general divorce rate per 1000 population, divorce certificates by type of divorce (revocable divorce, minor irrevocable divorce, Divorce against compensation "Khula" and major irrevocable divorce), spouses' age group, duration of marriage and kinship, in addition to divorce certificates by age groups.

It is worth mentioning that the data presented in this report is the outcome of cooperation between the Planning and Statistics Authority and the Supreme Judicial Council.

The data of this report include cases of marriage and divorce that took place and were registered in Qatar, and cases of Qatari marriage and divorce that took place abroad.

INDEX

Preface	5
Introduction	6

FIRST: MARRIAGE

General marriage rate per 1,000 Qatari population (15 years & above)	8
Marriage contracts by nationality of spouses and place of residence	9
Average age at first marriage by nationality	11
Age groups of spouses and nationality	12
Marriage Contracts by number of wives still under marriage bond and nationality	14
Marriage Contracts by marital status of wife and nationality	15
Marriage Contracts by educational status of spouses and nationality	16
Qatari Marriage Contracts by kinship	17

SECOND: DIVORCE

General divorce rate per 1,000 Qatari population (15 years & above)	18
Divorces by nationality of spouses and place of residence	19
Divorces by type of divorce and nationality of spouses	21
Divorces by type of divorce and husband's age group and nationality	22
Divorces by type of divorce and wife's age group and nationality	23
Divorces by duration of married life and nationality of husband	24
Divorces by educational status of spouses and nationality	26
Divorces of Qataris by kinship	27
Divorces by number of wives still under marriage bond and nationality	28
Divorces by nationality of spouses and number of wife's children	29

THIRD: TABLES	31
----------------------	-----------

FIRST: MARRIAGE

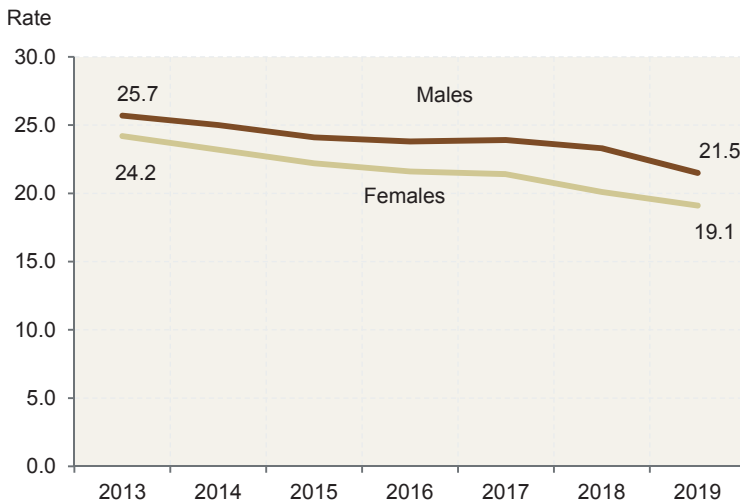

Marriage is the legitimate pillar for establishing a family and having children. Moreover, it is considered the means of the natural population growth. This part of the report analyzes some indicators related to marriage contracts.

General Marriage Rate per 1000 Qatari Population (15 Years & Above)

The general marriage rate is the number of marriages per 1000 population aged 15 years and above in a given year. Figure 1 indicates that the general marriage rate per 1000 Qatari population of age group (15 years and above) witnessed a decrease during the period (2013-2019). It decreased for males from 25.7 in 2013 to 21.5 in 2019. Likewise, female rate attained 19.1 in 2019 compared to 24.2 in 2013. This decline can be attributed to the high level of women's education and their large participation in labor market, in addition to the high expenses of marriage.

The general marriage rate witnessed a remarkable constant decrease for males and females alike, during the comparison period (2013 - 2019)

Figure No. (1) *General marriage rate per 1000 Qatari population (15 years & above), 2013–2019*

Marriage Contracts by Nationality of Spouses and Place of Residence

Figure 2 indicates that most marriage cases took place in Al-Rayyan Municipality, representing 40.3% of total marriages registered in the State of Qatar. Doha Municipality came second with a percentage of 29.9%, followed by Umm-Salal

Most marriages among Qataris took place in Al-Rayyan Municipality and non-Qataris in Doha Municipality 2019

with 7.6%, then municipalities of Al-Wakrah and Al-Khor, at a rate of 6.9% for each separately, then Al-Sheehaniya with 4%, and then the rest of municipalities (Al-Dhaayen, Al-Shamal,) with 2.8%, while marriages outside Qatar accounted for 1.6%.

As for marriage contracts by husband's nationality and place of residence, we find that most cases of Qatari male marriages took place in Al-Rayyan Municipality 45.6%, followed by Doha 22.8%, Al-Wakra 10.4%, Umm Salal and Al-Khor at a rate of 6.6% for each separately, Al-Sheehaniya with 4.6%, Al-Shamal 2.8%, and finally Al-Dhaayen with 0.6%.

As for Non-Qatari male marriages, most cases were concentrated in Doha Municipality 39.4%, followed by Al-Rayyan 33.2%, Umm-Salal 9%, Khor 7.1%, Al-Sheehaniya 3.2%, Al-Wakra 2.2%, and the rest of municipalities (Al-Dhaayen, Al-Shamal) with 2.1%. The remaining percentage of 3.8% was registered outside Qatar.

Figure No. (2) *Marriage contracts by spouses' nationality and place of residence, 2019*

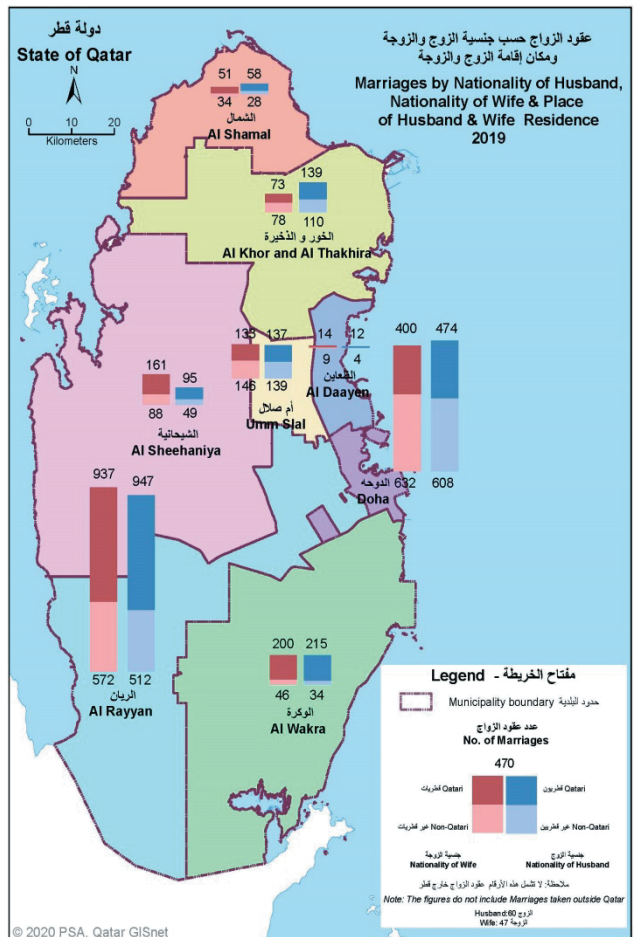

Figure (2) also shows that the highest percentage of Qatari female marriages took place in Al-Rayyan Municipality with 47.5% of total Qatari female marriages in Qatar, followed by Doha Municipality 20.3%, Al-Wakra 10.1%, Al-Sheehaniya 8.2%, Umm-Salal 6.7%, Al-Khor 3.7%, finally the rest of municipalities (Al-Dhaayen and Al-Shamal municipalities) with 3.3%. The remaining percentage of was registered outside Qatar (0.2%).

On the other hand, non-Qatari female marriages were mainly concentrated in Doha Municipality, representing 38.3% of total non-Qatari female marriages, followed by Al-Rayyan 34,7%, Umm-Salal 8.9%, Al-Sheehaniya 5.3%, Al-Khor 4.7%, Al-Wakra 2.8% , then the rest of municipalities (Al-Dhaayen and Al-Shamal) 2.6%, while 2.7% of marriages took place outside Qatar.

Average Age at First Marriage by Nationality

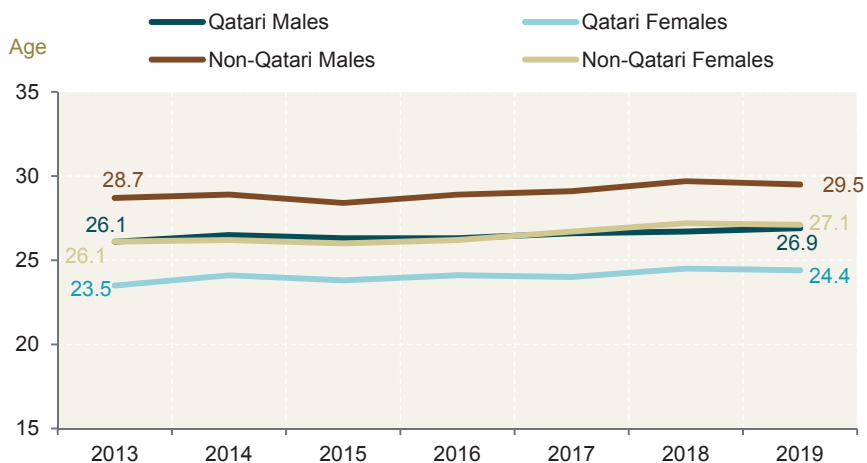

The average age at first marriage is one of the key indicators that show marriage characteristics in Qatari society. Data of this indicator show high average age at first marriage for non-Qataris compared to their Qatari counterparts in general. It is higher by almost two years and seven months for males and two years and eight months for females.

Slight increase of the average age at first marriage among Qatari males to 26.9 years and Qatari females to 24.4 years, compared to an increase for non-Qatari males to 29.5 years and non-Qatari females to 27.1 years.

As for Qataris, Figure 3 shows that the average age at first marriage witnessed a slight increase for males and females during the period (2013-2019); from 26.1 years and 23.5 years in 2013 to 26.9 years and 24.4 years in 2019 for males and females respectively.

During the period 2013-2019, the average age at first marriage for non-Qataris also witnessed a slight increase for males; from 28.7 years in 2013 to 29.5 years in 2019. However, the average for non-Qataris females witnessed a significant increase to 27.1 years in 2019 compared to 26.1 years in 2013.

Figure No. (3) *Average age at first marriage by nationality and sex, during the period 2013–2019*

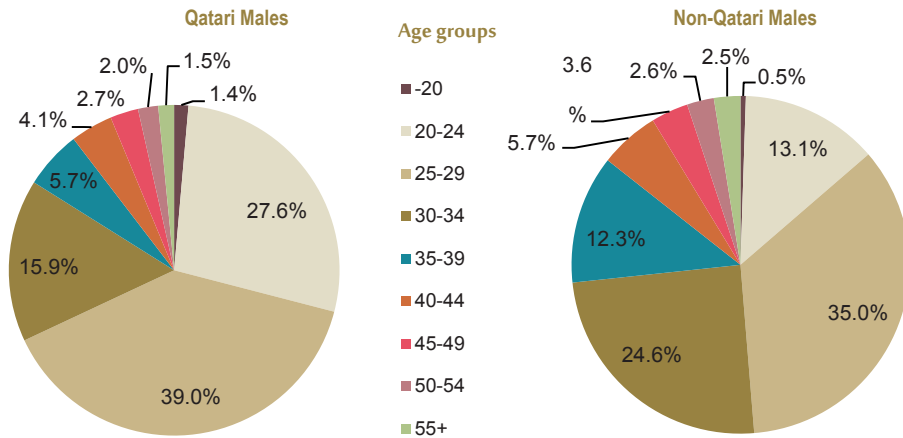

Age Groups of Spouses by Nationality

Figure (4-a) shows a rise in the ages of non-Qatari husbands compared to their Qatari counterparts in the age group (25-29 years), accounting for 39% of total Qatari husbands versus 39% of total non-Qatari husbands for the same age group.

The highest marriage cases took place in age group (25-29 years) by 39% among Qataris and by 35% among non-Qataris

On the other hand, marriage rates in the age-group (30-34 years) for non-Qataris increased to 24.6% of total non-Qatari husbands, while the percentage of Qataris for the same age group reached only 15.9% of total Qatari husbands.

Figure No. (4-a) *Marriage contracts by husband's age group and nationality (Qataris and non-Qataris), 2019*

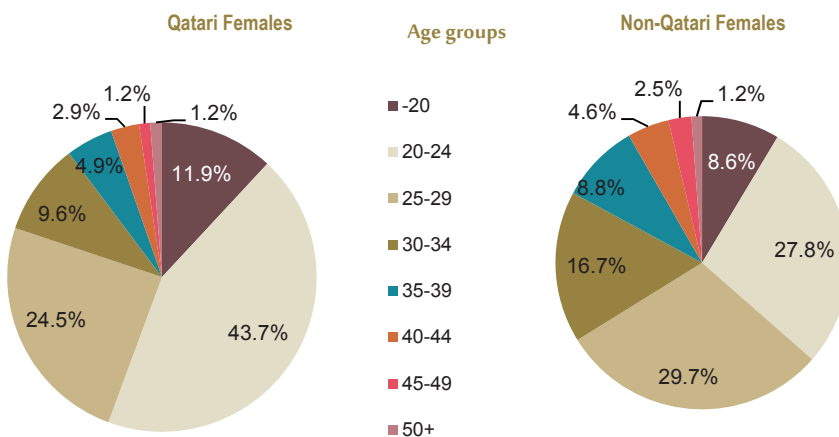

Similarly, Figure (4-b) shows an increase in the ages of non-Qatari wives compared to their Qatari counterparts, where the percentage of Qatari wives in the age-group (20-29 years) was higher than that of non-Qatari wives in the same age group; amounting to 68.2% of total Qatari wives and 57.5% of total non-Qatari wives.

Most marriages for Qatari and non-Qatari females took place in the age-group (20-29 years) by 68.2% and 57.5%, respectively

On the other hand, we notice a rise in the percentage of the age group (30-39 years) for non-Qatari wives, amounting to 25.5% of total non-Qatari wives compared to 14.5% of total Qatari wives. A slight variation of rates is noticed in the age-group (40-49 years) between Qatari and non-Qatari wives, amounting to 4.1% and 7.1%, respectively.

Figure No. (4-B) *Marriage Contracts by wife's age group and nationality (Qataris and non-Qataris), 2019*

Marriage Contracts by Number of Wives still under Marriage Bond and Nationality

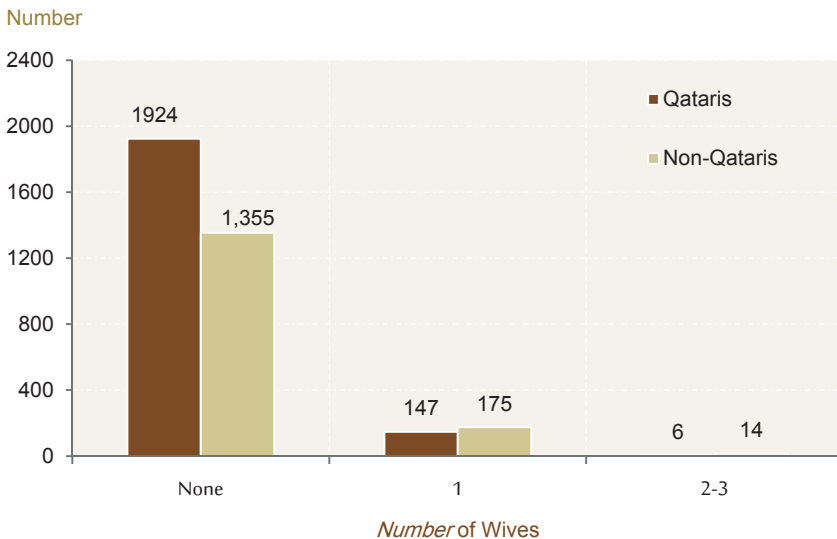

Figure 5 indicates that the percentage of marriage contracts of husbands with no other wife under marriage bond increased to 90.6% of total marriages, compared to about 9.4% of marriage contracts of husbands with one or more wives under marriage bond.

Percentage of marriage contracts of husbands with no other wife under marriage bond amounted to 90.6% of total marriages.

Moreover, the figure indicates that the percentages of Qatari and non-Qatari husbands who had no other wife under marriage bond were very close, ranging from 92.6% for Qataris and 87.6% for non-Qataris.

As for the percentage of those who had another wife under marriage bond, it amounted to 7.1% for Qataris and 11.4% for non-Qataris, whereas the percentage of those who had two or three wives under marriage bond did not exceed 0.3% for Qataris and 1% for non-Qataris.

Figure No. (5) *Marriage contracts by number of wives under marriage bond and by nationality, 2019*

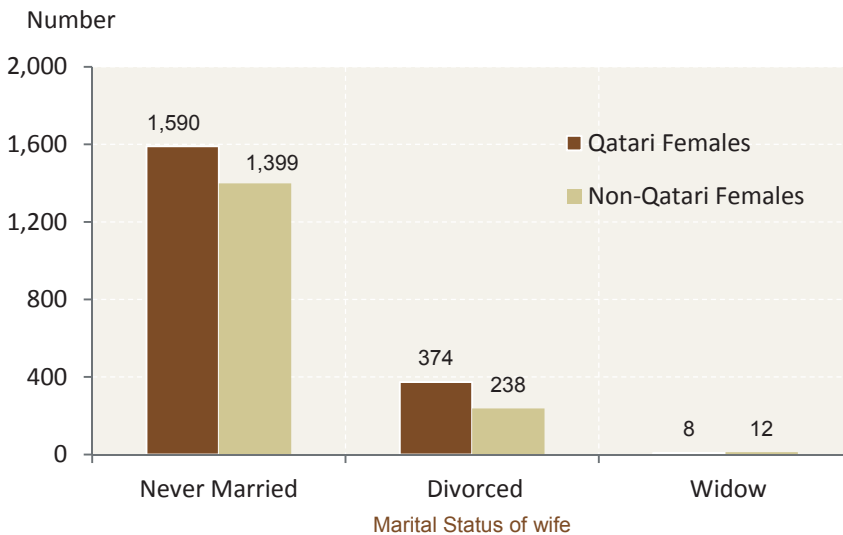

Marriage Contracts by Marital Status of Wife and Nationality

In general, Figure (6) indicates that the marriage percentage among virgin women increased to 82.5% of total marriages, compared to 17.5% of marriages where the wife was a widow or divorced.

Marriage percentage among virgin women accounted to 82.5% of total wives in marriage contracts

The percentage of Qatari virgin wives amounted to 80.6% compared to 19% for divorced wives and 0.6% for widows. As for non-Qataris, virgin wives accounted for 84.8%, whereas divorced women and widows accounted for 14.5% and 0.7%, respectively. It is noted that re-marriage of Qatari divorced women was higher by 4.5 percentage points than their non-Qatari counterparts.

Figure No. (6) *Marriage contracts by marital status and nationality of wife 2019*

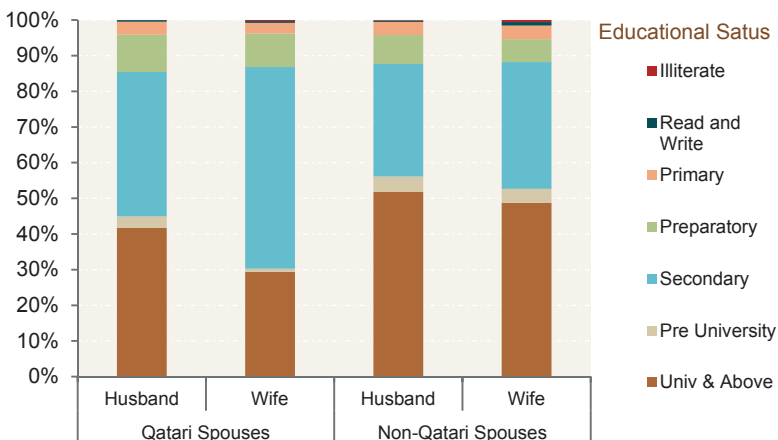

Marriage Contracts by Educational Status of Spouses and Nationality

Figure (7) shows the percentages of educational status by gender and nationality in marriage contracts of 2019. Marriage contracts for Qatari spouses show a higher percentage for those with secondary education of total marriages by the educational status of Qatari spouses, amounting to 40.3% for husbands and 56.4% for wives. Spouses with university degree or above came in the second place, accounting for 41.6% for husbands and 29.3% for wives.

Educational status plays a key role in marriage delay for non-Qataris compared to Qataris

Concerning marriage contracts of non-Qatari husbands, the higher percentage was for husbands with university degree and above (51.7%), followed by husbands with secondary education (31.5%) of total marriage contracts by educational status of the husband. There are no significant differences in the percentage of non-Qatari wives with university degree or above and wives with secondary education, accounting for 48.7% and 35.5% respectively of total non-Qatari females in marriage contracts by educational status. The high rate of marriage contracts for non-Qatari university graduates was due to the high age at first marriage, as mentioned earlier. On the other hand, the high rate of marriage among Qataris was noted in lower age groups, that is during their university studies and before graduation.

Figure No. (7) *Marriage contracts by educational status and nationality of spouses, 2019*

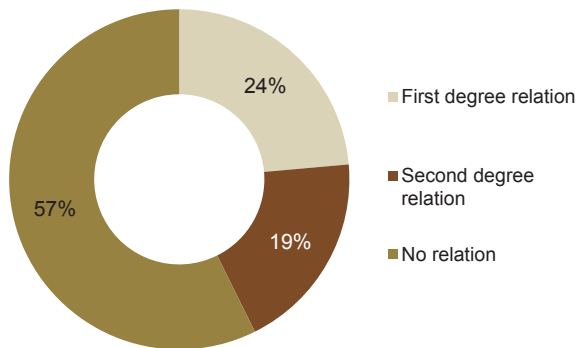

Qatari Marriage Contracts by Kinship

Figure (8) indicates the percentage distribution of Qatari marriage contracts by kinship in 2019. It shows that the percentage of consanguineous marriages remained high, reaching 43% of total marriages despite the awareness campaigns about the risks of consanguineous marriage. The marriages among first degree relatives amounted to 24%, whereas marriages among second-degree relatives were 19%. The percentage of non-related spouses amounted to 57% in 2019.

Despite the awareness campaigns, consanguineous marriage is still common among Qataris, with a high percentage amounting to 43% of total marriages, increasing by 2.4% in 2019 compared to 2018

It is observed that there is not expected increase in the percentage of marriage with relatives by a 2.4% in 2019 compared to 2018.

Figure No. (8) *Qatari Marriage contracts by kinship 2019*

Second: Divorce

The divorce cases will be addressed through indicators related to divorce rates and factors, such as the duration of married life, age and educational level of spouses and polygamy. The Qatari society witnessed a decline in general divorce rate in 2019 compared to 2018. This decrease mainly, resides in the number of cases reaching 759 cases among Qatari males and 654 cases among Qatari females. The key divorce indicators are as follows:

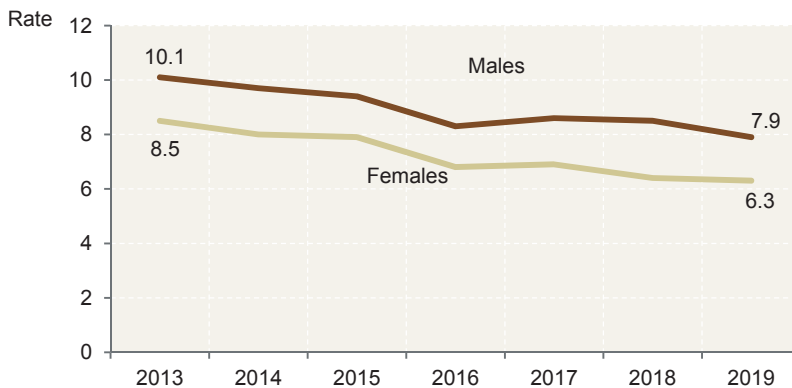

Divorce cases among Qatari males and females declined by 7.1% and 1.6% respectively in 2019 compared to 2018

General Divorce Rate per 1000 Qatari Population (15 Years & Above)

The general divorce rate is the number of divorces per 1000 population aged 15 years and above in a given year. Figure (9) indicates a decline in divorce rate among Qatari citizens per 1000 population during the period (2013-2019) from 8.5 for Qatari women in 2013 to 6.3 in 2019, at an annual decline rate of 5%.

As for Qatari men, the divorce rate also dropped during the period (2013-2019) from 10.1 in 2013 to 7.9 in 2019, at an annual decline rate of 4.1% during the comparison period.

Figure No. (9) *General divorce rate per (1000) Qatari population (15 years & above), 2013-2019*

Divorces by Nationality of Spouses and Place of Residence

Figure (10) indicates that most divorce cases occurred in Al Rayyan Municipality by 42.7% of total divorce cases registered in Qatar, followed by Doha Municipality by 33.1%, Umm Salal 6.2%, Al-Wakra 5.7%, Al-Khor 5.3%, Al-Sheehaniya 2.7%, and the remaining municipalities (Al-Dhaayen and Al-Shamal,) by 2.7%. In addition, 1.5% of divorce cases occurred abroad.

Most of Qatari divorces were in Al-Rayyan Municipality, whereas most of non-Qatari divorces were in Doha Municipality

With regards to divorce cases by husband's nationality and place of residence, it is noted that most cases of Qatari males divorces occurred in Al-Rayyan Municipality with 51.3%, followed by Doha 23.3%, Al-Wakra 8.2%, Umm Salal 5.5%, Al-Khor 5.4%, Al-Sheehaniya 3.2%, the remaining municipalities (Al-Shamal and Al-Dhaayen) with 3%, and 0.1% of divorce cases occurred abroad.

As for non-Qatari males divorce cases by place of residence, they were mostly concentrated in Doha Municipality by 50.6%, followed by Al-Rayyan 27.3%, Umm-Salal 7.4%, Al-Khor 5.2%, Sheehaniya by 1.9%, and the remaining municipalities (Al-Wakra, Al-Dhaayen and Al-Shamal) with 3.4%, whereas 4.2% of non-Qatari males divorces took place abroad.

Figure No. (10) Divorce declarations by nationality and place of residence of spouses, 2019

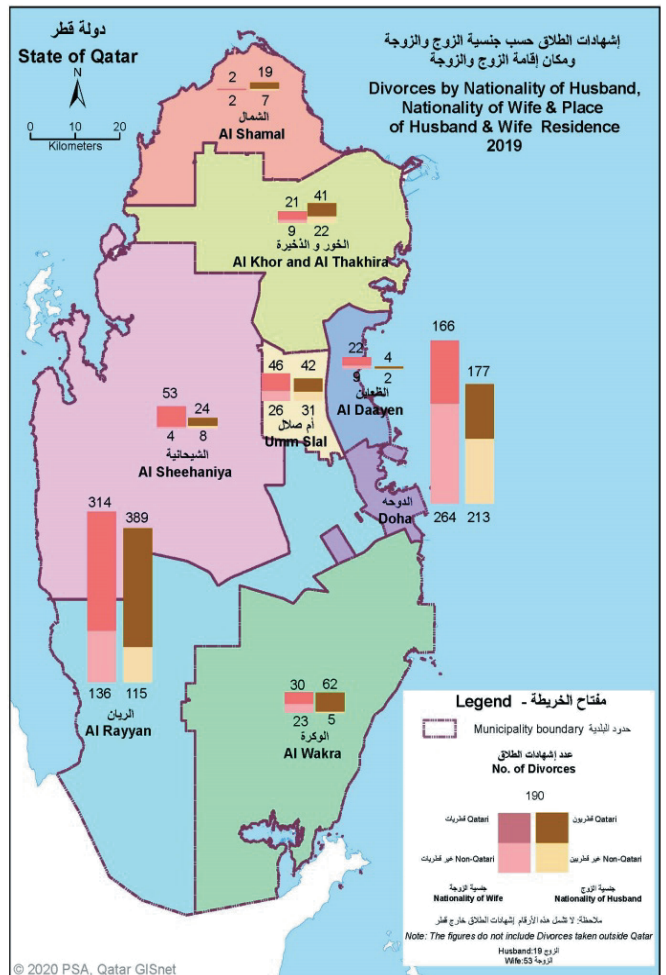

Figure (10) also shows that the majority of Qatari female divorces occurred in Al-Rayyan Municipality by 44.4% of total Qatari female divorces registered in Qatar, followed by Doha by 23.5%, Al-Sheehaniya by 7.5%, Umm-Salal 6.5%, Al-Wakra 4.2%, Al-Dhaayen 3.1%, and then the remaining municipalities (Al-Khor and Al-Shamal) by 3.3%. The percentage of Qatari females who were divorced abroad reached 7.5%.

The figures of non-Qatari female divorces were mainly concentrated in Doha Municipality by 55.8% of total non-Qatari female divorces, followed by Al-Rayyan by 28.8%, Umm-Salal 5.5%, Al-Wakra and Al-Dhaayen by 1.9% for each separately, and then the remaining municipalities (Al-Shamal, Al-Sheehaniya) by 1.2%. The percentage of Non-Qatari women divorced outside country is zero.

Divorces by Type of Divorce and Nationality of Spouses

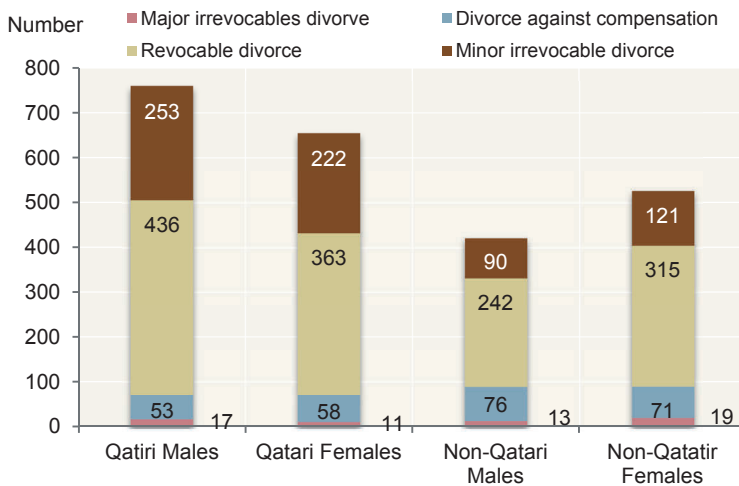

The results show an increase in revocable divorce (divorcing a wife less than three times after consummation of marriage) and minor irrevocable divorce (when the first or second divorce takes place after the end of the wife’s “Iddah” period before or after consummation of marriage) by 57.5% and 29.1% respectively, in 2019.

Revocable and minor irrevocable divorce cases represent 86.6% of total types of divorce

Figure (11) shows also a decrease in major irrevocable divorce (the threefold divorce which is irrevocable except if the divorced wife legitimately marries another man and then divorces him) to 2.5%, and Divorce against compensation “Khula” (divorce occurs upon wife’s request in return for an amount of money paid to the husband) to 10.9%.

Figure (11) details the number of divorces by type of divorce and nationality of spouses.

Figure No. (11) *Divorce cases by type of divorce, sex and nationality of spouses, 2019*

Divorces by Type of Divorce and Husband's Age Group and Nationality

Figure (12-a) indicates that divorce cases were higher among Qatari husbands in the age group (20-29 years), amounting to 39.7% of total Qatari divorce cases by age-group, followed by the age-group (30-39 years), amounting to 31.9%.

The lowest divorce rate was recorded in the age group (under 20 years), reaching 0.3% due to the small number of married couples in this age group.

As for non-Qatari husbands, Figure 12-b shows that the highest percentage of divorces was among the age-group (30-39 years) by 42.7% of total non-Qatari divorces by age group, followed by the age-groups (40-49 years) and (20-29 years) by 24.2% and 21.3%, respectively.

The lowest divorce rate among non-Qataris was for the age-group (60 year and above) with the exception of the age group (less than 20 years), in which the percentage is zero.

Figure No. (12-A) *Divorce cases by type of divorce and husband's age group (Qataris), 2019*

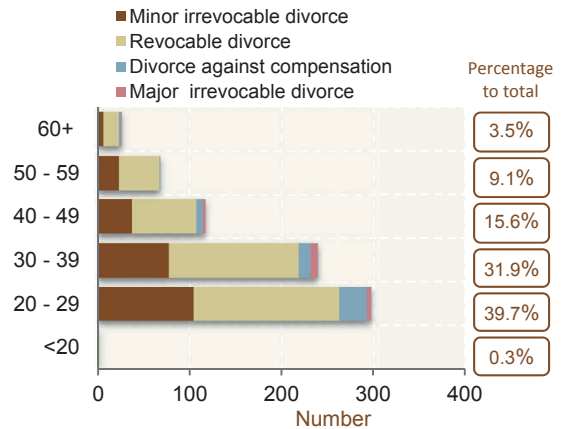

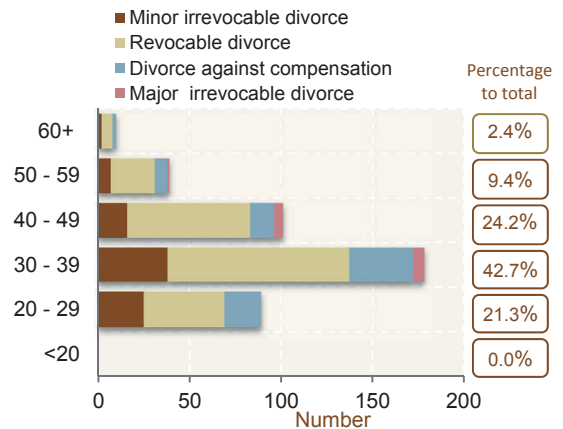

Figure No. (12-B) *Divorce cases by type of divorce and husband's age group (Non-Qataris), 2019*

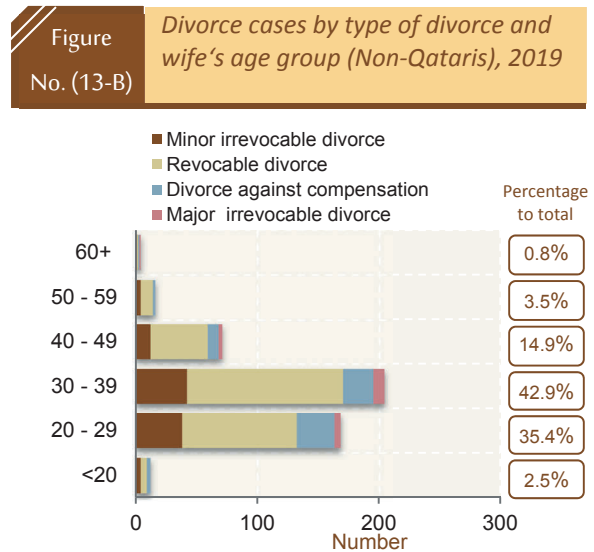

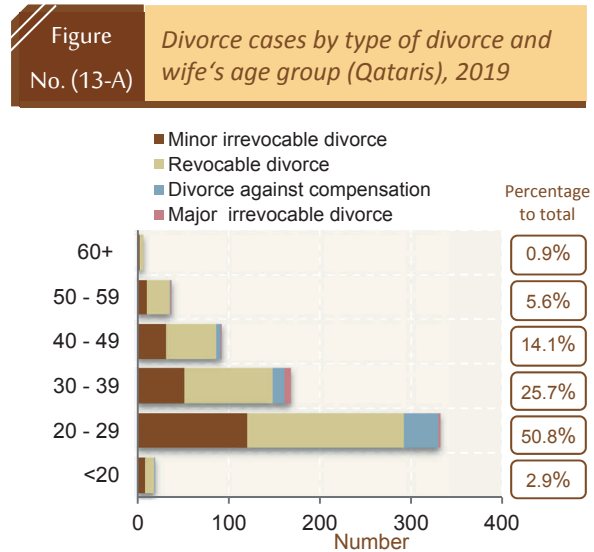

Divorces by Type of Divorce and Wife's Age Group and Nationality

With regard to Qatari wives, Figure (13-a) shows that the divorce rate was higher among the age group (20-29 years), amounting to 50.8% of total divorces by Qatari wife's age group, followed by the age groups (30-39 years) and (40-49 years) with 25.7% and 14.1%, respectively. The lowest divorce rate was recorded among the age group (60 years and above) at 0.9%.

As for non-Qatari wives, the highest rate of divorce was among the age group (30-39 years), amounting to 42.9% of total divorces by non-Qatari wife's age group, followed by the age group (20-29 years) at 35.4%, and age group (40-49 years) at 14.9%.

The lowest percentage was recorded among the age group (60 years and above) by 0.8%.

Divorces by Duration of Married Life and nationality of husband

Figure (14-a) indicates that most divorce cases by duration of married life in 2019 occurred during the first period of less than five years of marriage and also before the period of consummation, the fact that accounts for the increase in minor irrevocable divorce and the revocable divorce as previously mentioned.

Increase of divorce cases during the first five years of marriage.

The divorce rate during the first period of less than five years and before consummation amounted to 72.4% of total divorces by duration of married life (more than two thirds of total divorce cases). It is also observed that the percentage of divorcees whose married life exceeded 20 years was the lowest of total divorce cases by duration of married life. Figure (14-a) further shows an increase in the percentage of divorcees whose married life ranged between 5 and 9 years, representing 13.4% of total divorces in 2019. It is observed that the percentage of divorce steadily decreasing the longer the marital life period.

Figure No. (14-A) *Divorce cases by duration of wife's married life, 2019*

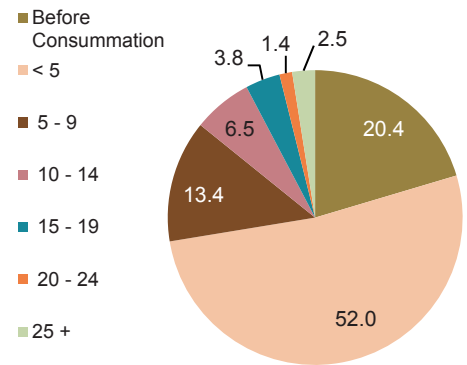

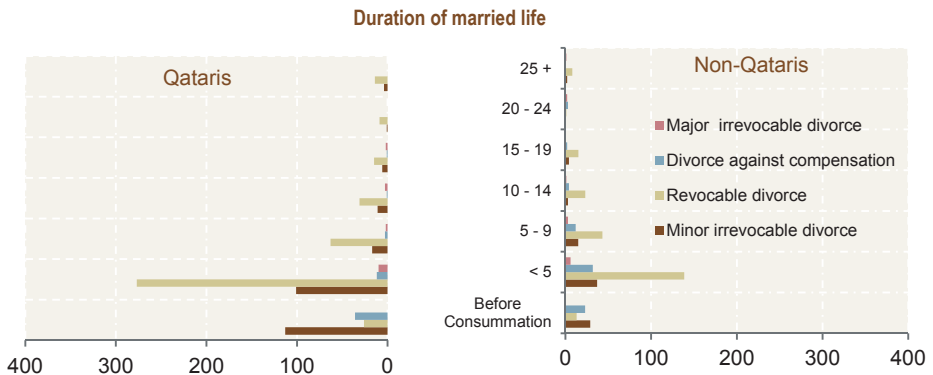

Figure No. (14-B) *Divorce cases by type of divorce, duration of married life and nationality of husband, 2019*

In more detailed account of the divorces occur during the first four years of marriage or before consummation that are very high compared to other periods of married life.

Figure (15) indicates that 59.2% of divorces that occurred before consummation of marriage were minor irrevocable divorces, whereas revocable divorces made up 16.3%. Divorce against compensation “khula” 17.3%, and major irrevocable divorces accounted for 0% of total divorces before consummation of marriage.

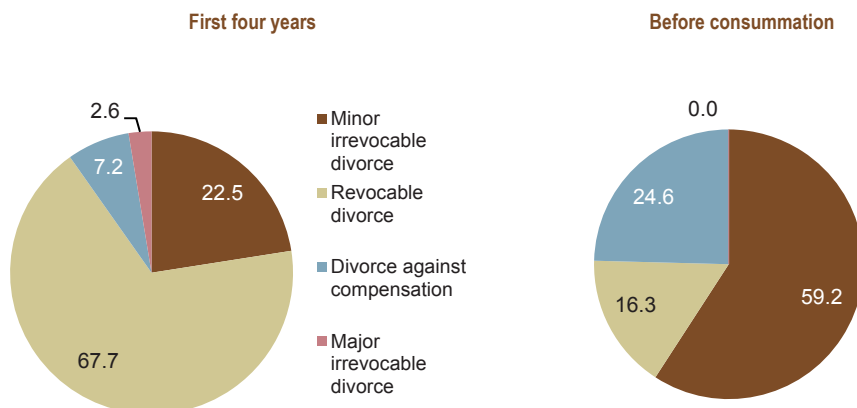

As for the first four years of marriage, revocable divorces made up the highest percentage of divorce cases with 67.7%, while minor irrevocable divorces made up 22.5%. Divorce against compensation “khula” and major irrevocable divorces constituted 7.2% and 2.6%, respectively.

Regarding the age groups, the divorce before consummation of marriage was the highest among the age group (20-24 years) for Qatari and non-Qatari wives alike.

As for the divorce cases during the first four years of marriage, the highest number of divorces was among age group (25-29 years) for Qatari females and males.

With regard to Qatari and non-Qatari husbands, the highest rate of divorce before consummation was among the age-group (25-29 years) for Qatari and non-Qatari males alike, whereas the highest rate of divorce during the first four years of marriage was among the age group (25-29 years) for Qatari males versus the age group (30-34 years) for non-Qatari males.

Figure No. (15) *Divorce cases by type of divorce during first four years of marriage and before consummation, 2019*

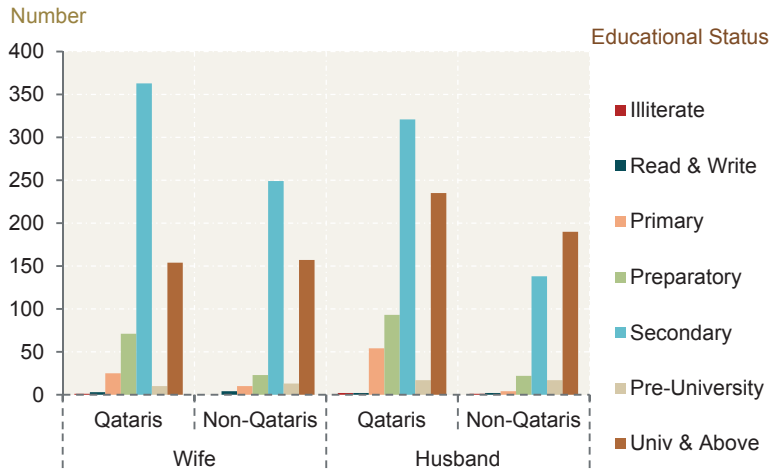

Divorces by Educational Status of Spouses and Nationality

Figure (16) shows the educational status of divorcees (males and females). It is clear that the highest percentage of Qatari divorcees was among secondary school graduates, with 363 cases for Qatari females and 321 for Qatari males (55.5% and 42.3%, respectively).

As for non-Qatari females, the secondary school graduates category made up the highest percentage of total Non-Qatari divorced women (47.3%), whereas the highest percentage of Non-Qatari male divorcees was recorded among holders of university degrees and above (54.1%).

Figure No. (16) *Divorce cases by educational status of spouses 2019*

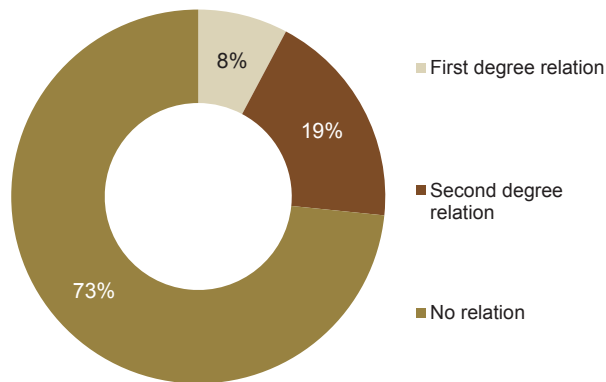

Divorces among Qataris by Kinship

Figure (17) which indicates the relationship between divorce and Qatari kinship, shows that divorce cases among Qatari males and females who had no blood ties were the highest (73%), whereas divorce cases among first degree and second degree relatives made up 37% of total divorces (8% for first degree relatives and 19% for second degree relatives).

About 27% of Qatari divorce cases were among consanguineous spouses

Figure No. (17) *Qatari Divorce cases by kinship, 2019*

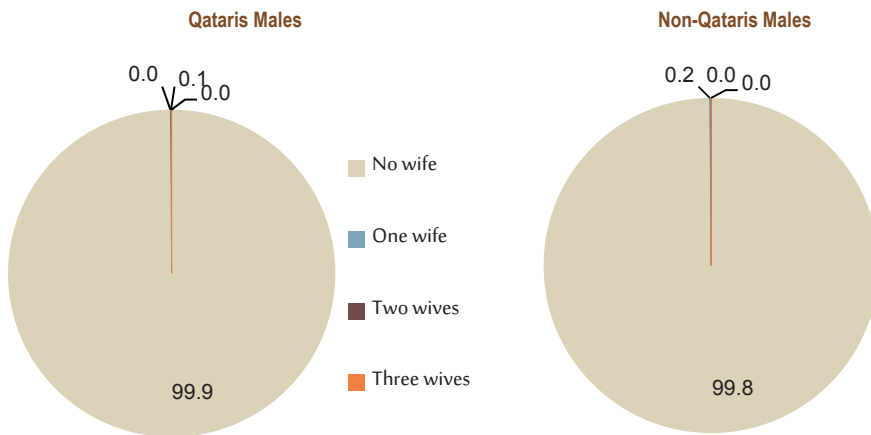

Divorces by Number of Wives Still Under Marriage Bond and Nationality

Figure (18) shows the divorce cases by number of wives still under marriage bond, and indicates that all divorce cases in 2019 took place among those who had no other wives under marriage bond, accounting for 99.9% of total divorce cases for Qatari husbands. Divorce cases among those who had one or more wives under marriage bond made up only 0.1%.

The percentage of non-Qatari husbands was almost the same as that of their Qatari counterparts, amounting to 99.8% for those had no other wife under marriage bond and less than 0.2% for those who had one or more wives under marriage bond.

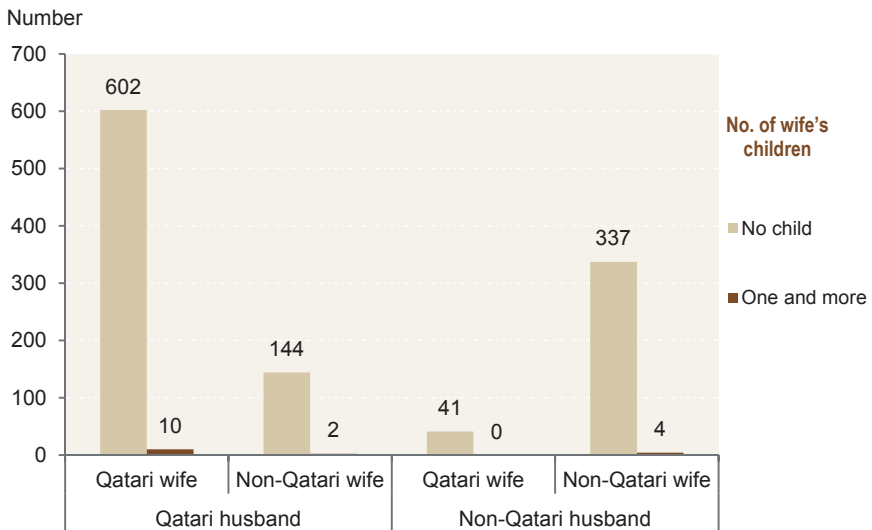

Figure No. (18) *Divorce cases by number of wives still under marriage bond, 2019*

Divorces by Nationality of Spouses and Number of Wife’s Children

Figure (19) shows the divorces by number of children for both Qataris and non-Qataris, indicating that the majority of divorces in 2019 occurred between spouses with no children amounting to 98.6% of total divorces by number of children. The divorce rates between spouses who had children were convergent and less than 1%, regardless of the number of children. This is due to the high rate of divorce before consummation of marriage and during the first four years of marriage as mentioned earlier.

Figure No. (19) *Divorce cases by nationality of spouses and number of wife’s children, 2019*
