Aditya Agrawal

As Technical Manager for the Global Partnership for Sustainable Development Data, Aditya Agrawal works with more than 150 data champions around the world to advance country-led data roadmaps for sustainable development and harness the data revolution for the Global Goals.

He helps to convene, connect and catalyze efforts to drive innovation through the use of more dynamic, real-time and disaggregated data for decision-making to support the 2030 Agenda for Sustainable Development.

Aditya has more than 15 years of experience in international development using geography and open data to drive action on issues related to environment, sustainable development and public health.
