The layers of data system and stewardship

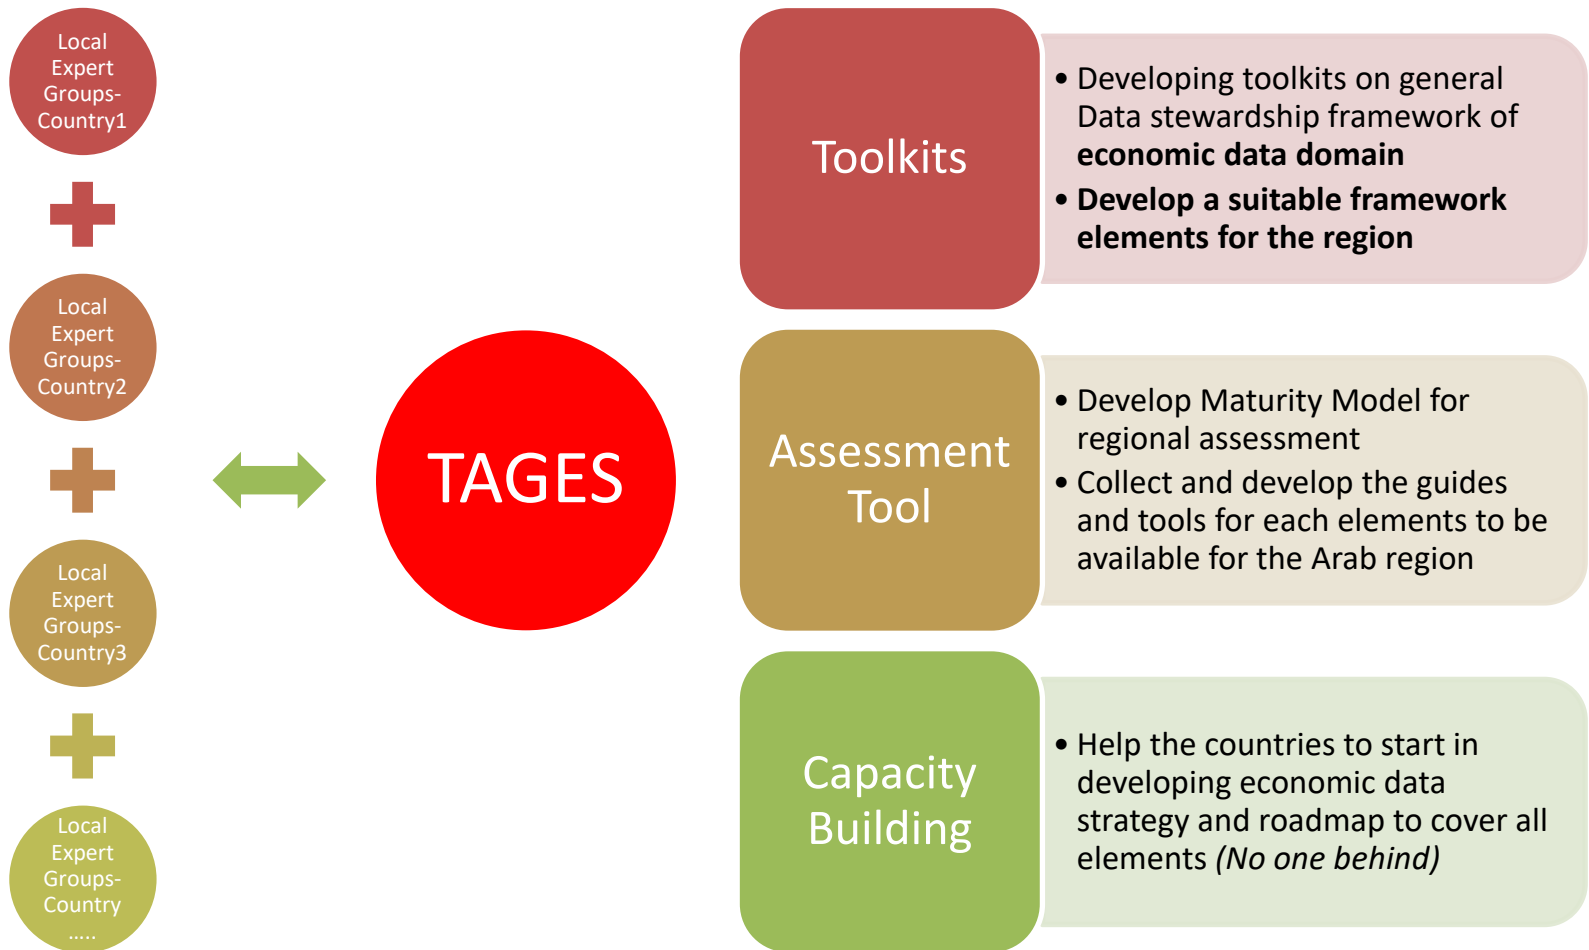

Data stewardship framework elements

Proposed by NewZealand

How can we go ahead practically in Arab Region?

TAGES can lead the effort

How can we go ahead practically in Arab Region?

Local Expert Group for Economic data to lead the work in the country X

Qatar can be the leader

Establish the expert group for economic statistic

Prepare ToR for a comprehensive project to develop the tools and the draft concept of Stewardship, Networks, and Ecosystems for the Economic Statistics in Qatar

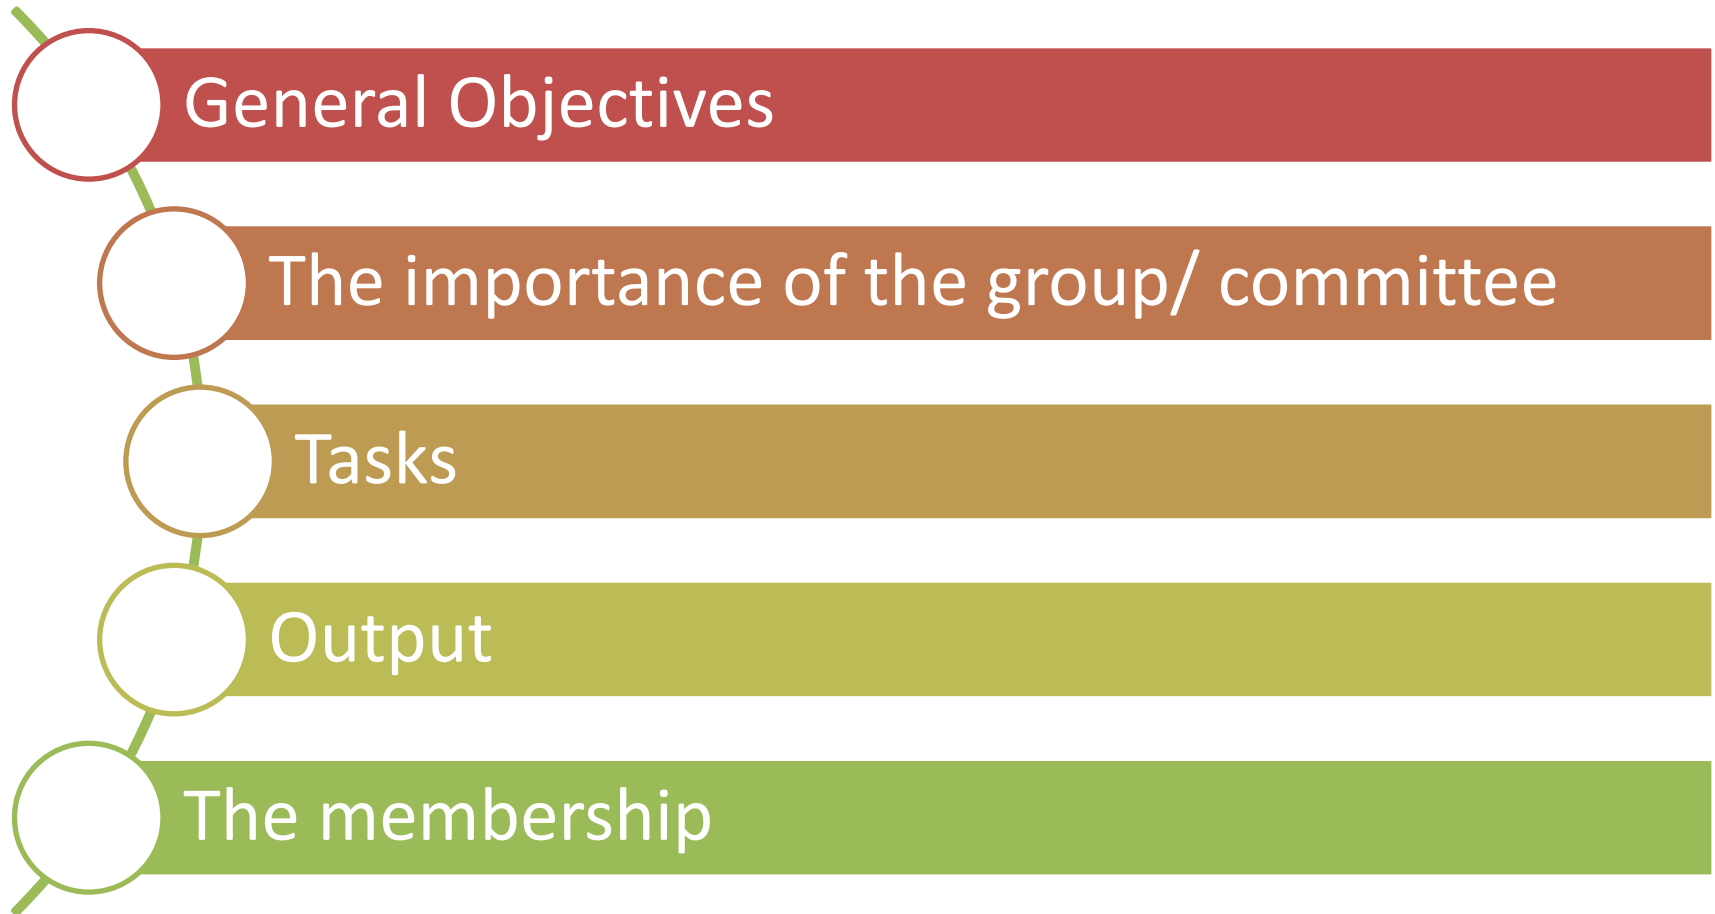

Doing first exercise of self assessment and develop first template of data strategy and roadmap

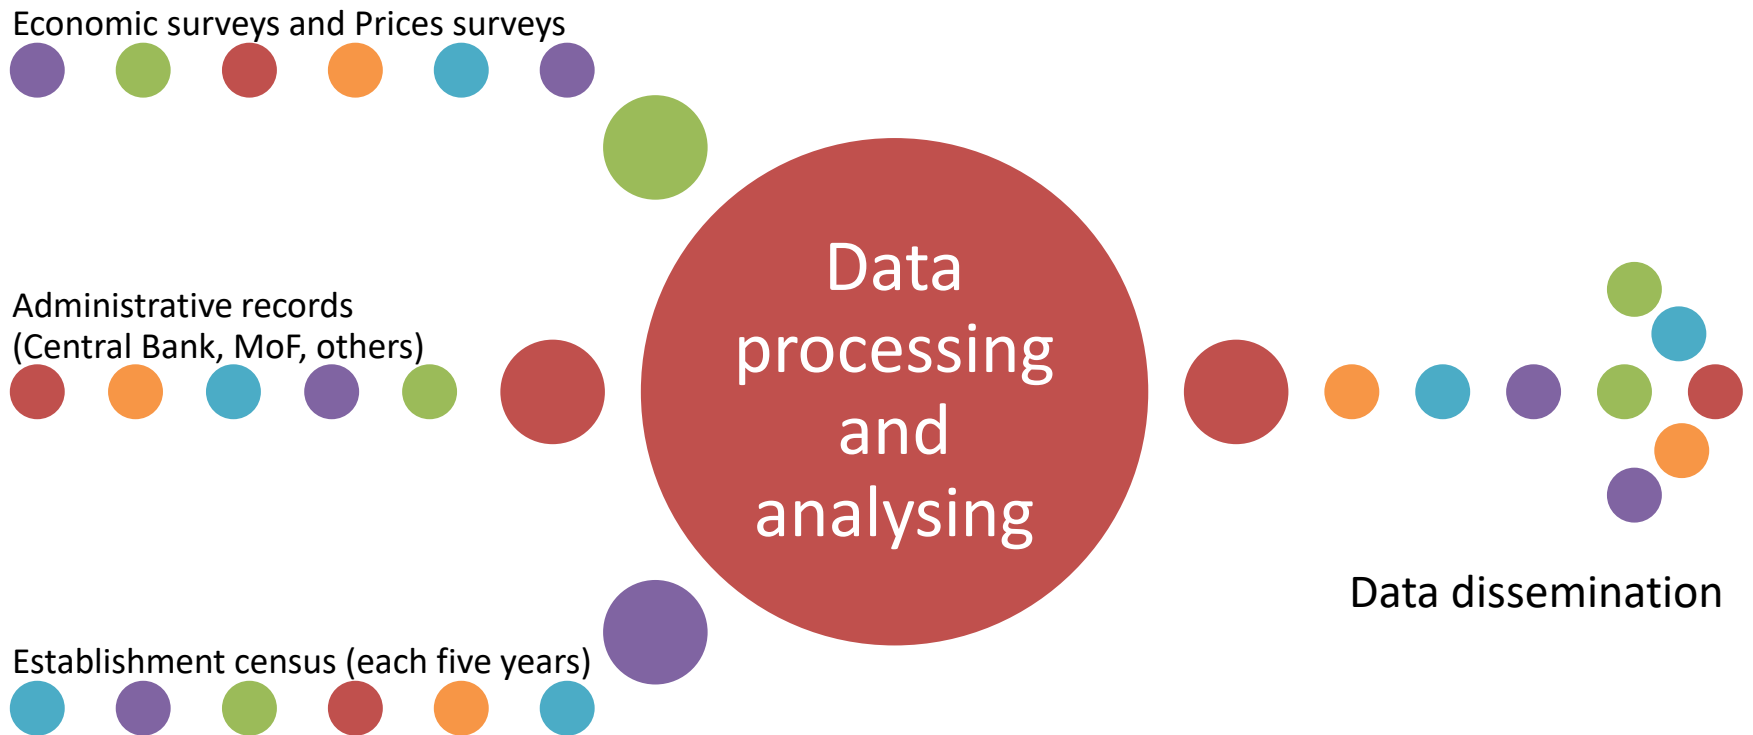

Sharing the whole project process and results with TAGES and other international agencies to be as first case in the region that can be follow

Expert Group for Economic Statistics: ToR

Producing, analysing and using economic statistics current situation

Ecosystem

less cost with complex process

Managing the data collection,
classifying, networking and
stewardships:

Different concepts, different
references, different laws,
