

Marriages & Divorces

State of Qatar 2011 (Review & Analysis)

Marriages & Divorces

In State of Qatar 2011
(Summarized Review)

December, 2013

Preface

Marriage & Divorce statistics are deemed one of the cornerstones of the vital statistics which are used as a significant element when making decisions and setting policies and programs to enhance family cohesion. Indicators, which are derived from these data, disclose all the aspects surrounding the marriage and divorce phenomena which have gained great interest in the field of population and social studies.

In general, the society's demographic behavior can be identified through statistics analysis of marriage and divorce. Besides, the indicators furnished by the marriage & divorce statistics are used as benchmarks for attaining short and long term goals and for improving the social and economic conditions for the entire society of Qatar.

The report clarifies the development of both marriage and divorce phenomena and their various components, such as marriage & divorce rates, average age at the first marriage as well as the characteristics of marriage and divorce during 2011, seeking to identify the factors behind late marriage and divorce as well as their repercussions on the family cohesion.

Ministry of Development Planning and Statistics hope that the governmental agencies, private institutions of public interest and civil society organizations will benefit from this report including its marriage & divorce indicators of 2011, and to establish plans and policies aiming to encourage the youth for marriage, and to eliminate the propagation of divorce phenomena as well as to find effective solutions among the youth age groups.

H.E. Dr. Saleh Al-Nabit
Minster of Development Planning & Statistics

Introduction

Marriage & Divorce statistics are considered one of the most significant vital statistics within which the characteristics of marriage and divorce phenomena are studied to determine the family characteristics and the society's experiences on the population growth related issues.

Seeking to identify the evolution of marriage and divorce phenomena in the State of Qatar in 2011, this report, in its first section, deals with the issue of marriage. It contains data and indicators such as the average age at first marriage, general marriage rate and bulletin on marriage characteristics in the Qatari society through indicators of first marriage, age groups of spouses and their educational level.

As for the report second section, it focuses on divorce in the Qatari society. It comprises analysis of divorce including general divorce rate per 1000 population, types of divorce (revocable, minor irrevocable divorce, divorce against compensation and major irrevocable divorce) as per the spouses age group and duration of marriage and kinship in addition to divorce according to age groups.

It is worth mentioning that the data pointed out in this report is the outcome of cooperation between Ministry of Development Planning and Statistics and the Supreme Judiciary Council.

Data of this report include events of marriage and divorce that took place and registered in Qatar and cover cases of marriage and divorce happened outside the country.

• Divorce by number of children and nationality of spouses	24
Third: Tables	25

First: Marriage

Marriage is deemed the legitimate pillar to establish a family and give birth to children. Further, it is considered a means to raise the natural growth of population. This part of the report will tackle some indicators related to marriage contracts.

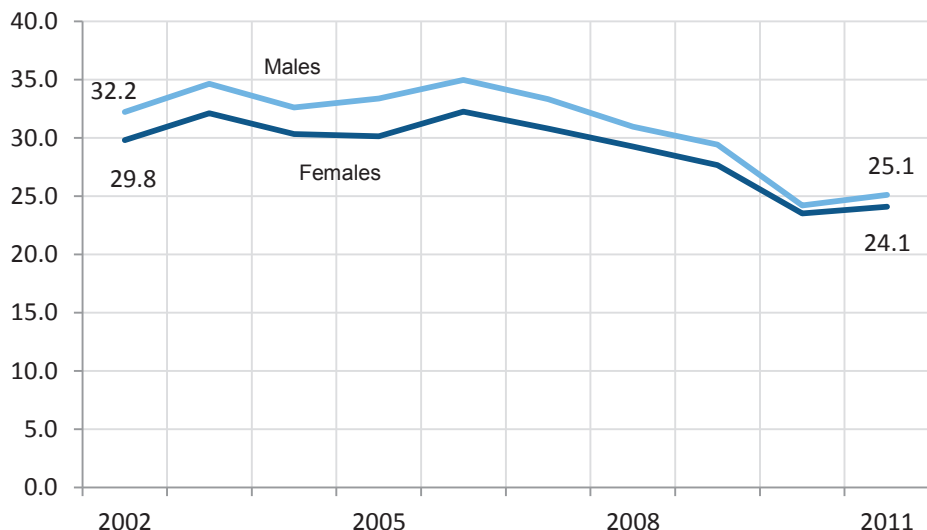

- **General marriage rate per 1000 Qatari population 15 years & above**

Graph (1) indicates that the general marriage rate per 1000 of Qatari population for age group 15 years and above witnessed a relative increase for both sexes during the period 2002-2006. The highest rate was in 2006 by 34.8 for males compared to 32.2 in 2002, whereas the highest rate for females attained 34.0 in comparison to 29.8 in 2002, then started to decrease during the last three years to reach 24.3 for males and 23.5 for females in 2010. Later in 2011, it was slightly increased to 25.1 for males and 24.1 for females. This decline can be attributed to the high level of women's education and their strong access to the labor market in addition to the high cost of marriage.

The general marriage rate slumped for both males and females during the recent years

Graph No. (1)

General marriage rate per 1000 population 15 years and above (Qataris) 2002-2011

• **Marriage by nationality of spouses and husband's place of residence**

The most of marriage cases have occurred in Al-Rayyan Municipality, representing 44.4% of the total marriages in the State of Qatar. Doha municipality comes second by a percentage of 32.0%, followed by Umm Salal with 7.6%, Al-Wakrah with 6.0%, and the rest of the municipalities (Al-Khour, Al Shamal, Al Daayen) with 4.2%.

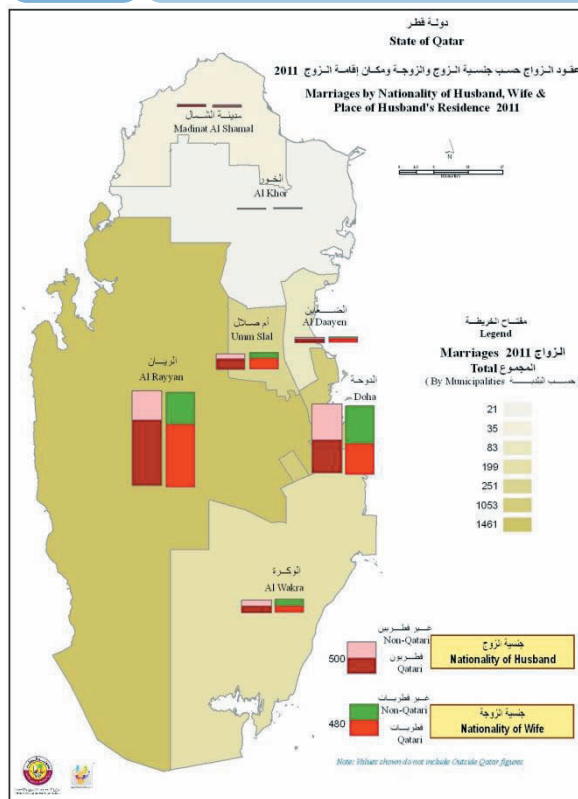

Most marriages among Qataris took place in Al Rayyan municipality, whereas those of non-Qataris occurred in Doha municipality

For marriages according to nationality and place of residence of the husband, it was found that most cases of Qatari marriage cases occurred at Al Rayyan municipality with 53.1%, followed by Doha municipality with 26.6%, Umm Salal municipality 9%, Al Wakrah municipality 5.6% as well as the rest of municipalities with 5.7%. As for the non-Qatari marriage cases, 39.4% was registered in Doha municipality, followed by Al Rayyan with 32.5%, Al Wakrah 6.7%, Umm Salal 5.7% and finally the rest of other municipalities (Al Khor, Al Shamal, Al Daayen) with 2.2%.

Graph (2) also shows that the biggest marriage percentage of Qatari females took place at Al Rayyan municipality with 50.2% of total marriage cases in Qatar, followed by Doha municipality 24.3%, Umm Salal 8.5%, Al Wakra municipality 5%, then the rest of municipalities (Al Khor, Al Shamal and Al Daayen) 5.1%.

Non-Qatari female marriages were mainly located in Doha municipality, representing 42.8% of total marriages of non-Qatari females, followed by Al Rayyan municipality 36.2%, Al Wakra municipality 7.5%, Umm Salal municipality 6.4%, and the rest of the municipalities (Al Khor, Al Shamal and Al Daayen) with 2.9%.

Graph No. (2) Marriage by nationality of spouses and husband's place of residence, 2011

• **Average age at first marriage**

The average age at first marriage is one of the most important indicators that shows marriage characteristics of the Qatari society. It shows high average age at first marriage for non-Qataris compared to its counterpart for Qataris. In general, it is higher by a three-year percentage for males, and two years and a half for females.

Average age at first marriage among non-Qataris (males and females) witnessed an increase to 29.6 and 26.5 years respectively. For Qatari females and males, it attained 24.1 and 26.7 years respectively.

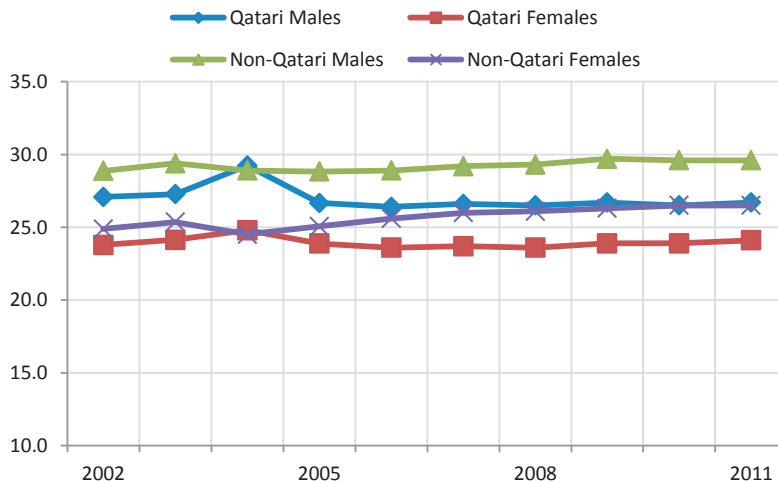

Graph (3) shows that the average age at first marriage for non-Qataris witnessed a noticeable increase during the period (2002-2011). It increased from approximately 24.7 years in 2002 to 26.5 in 2011 for females, whereas it increased from 28.9 to 29.6 years for males for the same period.

As for Qataris, the average age at first marriage increased slightly for females during the period 2002-2011; from 23.8 to 24.1 in 2011, whereas it witnessed a slight decrease for males; it declined from 27.1 in 2002 to 26.7 in 2011.

There is a tiny difference between the average age at first marriage for males and females; it reached 2.6 years among Qataris and 3.1 years for non-Qataris in 2011.

Graph No. (3)

Average age at first marriage by nationality & gender 2002-2011

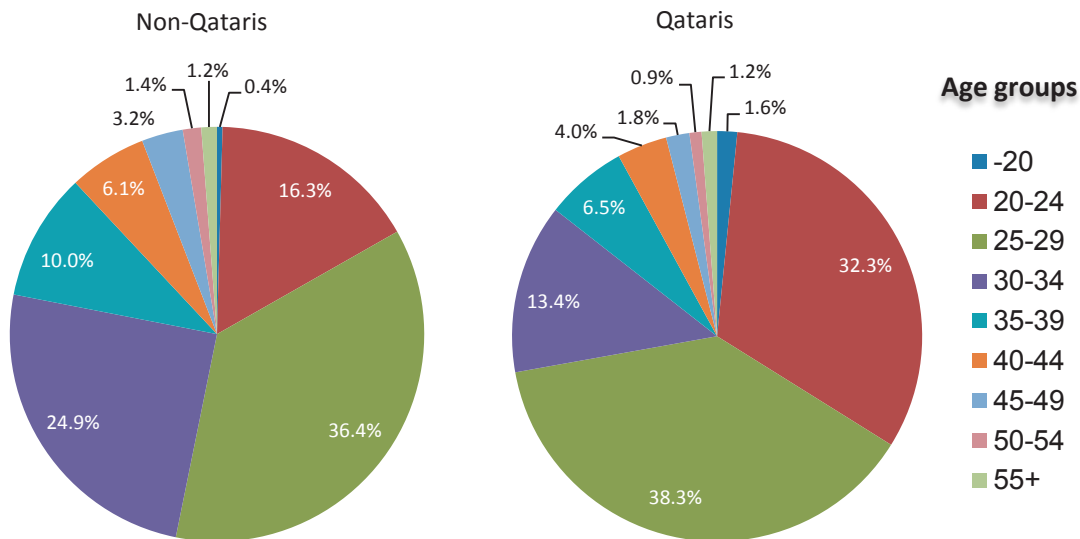

• **Age groups of spouses**

Graph (4-a) shows an increase in age group ratio among non-Qataris, where the ratio of husbands in the age group (20-29) amounts to 52.7% of total non-Qatari husbands, whereas the ratio for the same age group of Qatari husbands reaches 70.6% of total Qatari husbands.

Age group 20-29 witnessed highest marriage cases among both Qataris and non-Qataris with ratios of 70.6% and 53% respectively

The graph also shows an increase in the non-Qatari age group (30-39) by reaching 34.9% of total non-Qatari husbands, whereas the ratio for the same age group of Qataris attains 19.9% of total Qatari husbands.

Graph No. (4-A) **Marriages by husband's age group and nationality (Qataris & non-Qataris), 2011**

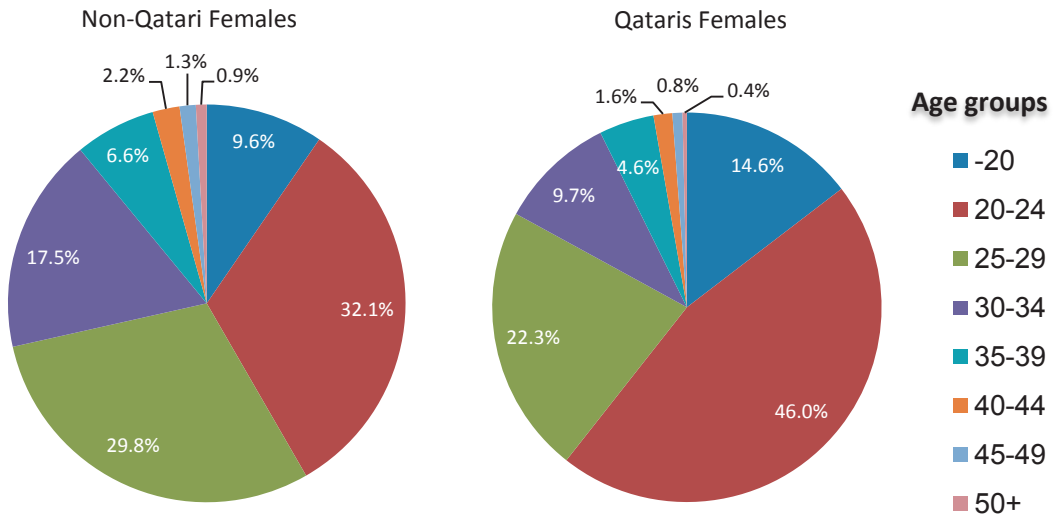

Similarly, the Graph (4-b) shows the increase of non-Qatari wives age relative to the Qatari wives', where the percentage of Qatar wives for the age group (15-24) is greater than its equivalent for the non-Qataris regarding the same age group; they are 60.6% and 41.7% respectively.

On the contrary, we notice a rise in the percentage of the age group (25-34) for non- Qatari; it amounts to 47.3% for non-Qatari wives compared to 32% for Qatari wives. Besides, there is an increase in the percentage for the age group (35-44) for non-Qataris with a margin of 5% in comparison with Qataris of the same age group.

Most marriages of Qatari females take place at age group (15-24) with a ratio of 60.6%, whereas most marriages of non-Qatari females take place at age group (25-34) with 47.3%.

Graph No. (4-B) **Marriages by wife's age group and nationality (Qataris & non-Qataris), 2011**

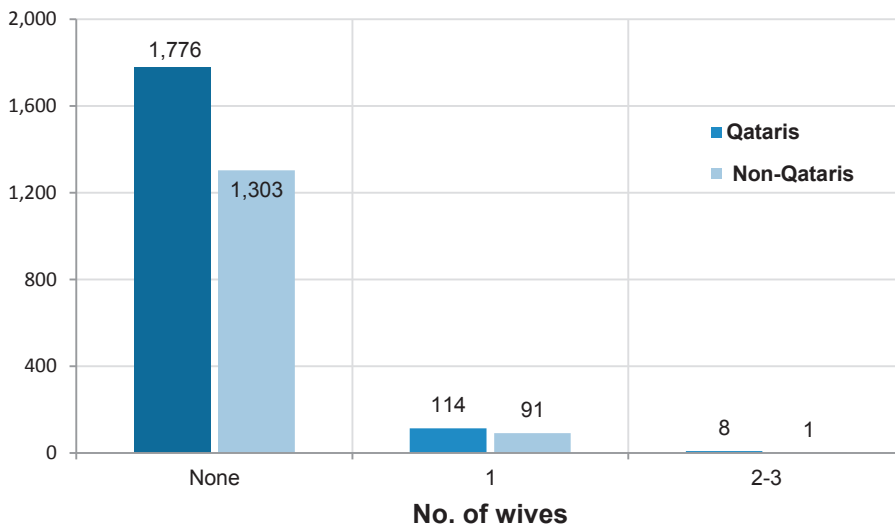

- Marriages by number of current wives**

Graph (5) indicates an increase in the percentage of marriage contracts of husbands who do not have other wives, it amounts to 93.5% compared to marriage contracts of husbands who have one or more wives with a percentage of 6.5%. the percentage of those who have only one wife ranges from 93.6% to 93.4% for Qataris and non-Qataris respectively.

Percentage of Marriage contracts with no other current wives amounts to 93.5% of total spouses.

The percentage of those who have another wife is 6% for Qataris and 6.5% for non-Qataris. As for the percentage of those who have two or three wives does not exceed 0.4% for Qataris and 0.1% for non-Qataris.

Graph No. 5 **Marriages by number of current wives, 2011**

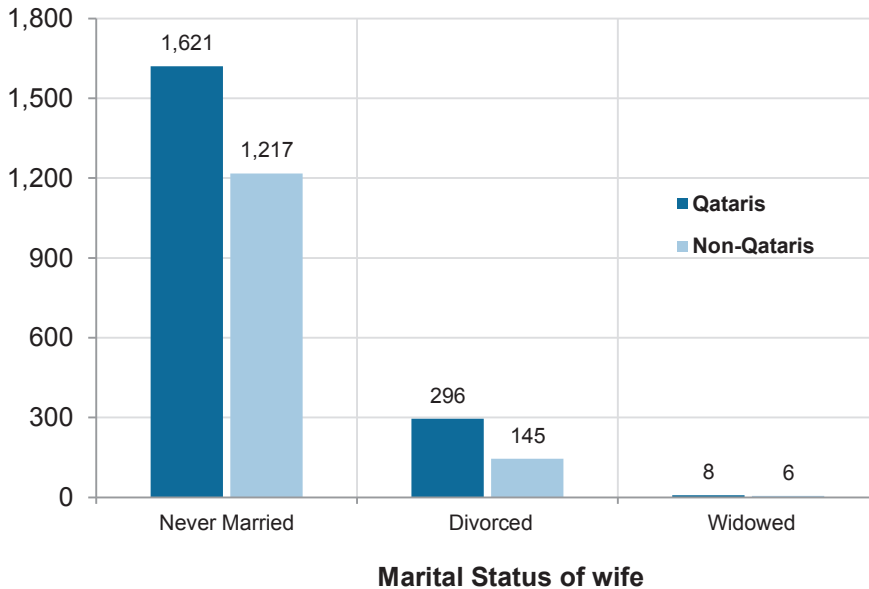

• **Marriages by marital status of wife**

In general, graph (6) shows that marriage percentage is high among those who have not married previously, since it amounts to 84.2%. Widows and divorced women represents 15.8% of total marriages.

The percentage of Qatari wives who have never married before amounts to 84.2%, whereas 15.4% for the divorced women and 0.4% for widows. As for the non-Qatari wives who have never married before amounts to 89%, whereas 10.6% for the divorced women and 0.4% for widows. It is noted that the Qatari divorced females increased by 4.8% compared to the non-Qatari ones.

Increase of marriage percentage among women, who did not marry before, compared to widows and divorcees whose percentage amounts to 86.2% total wives.

Graph No. 6 **Marriages by marital status of wife, 2011**

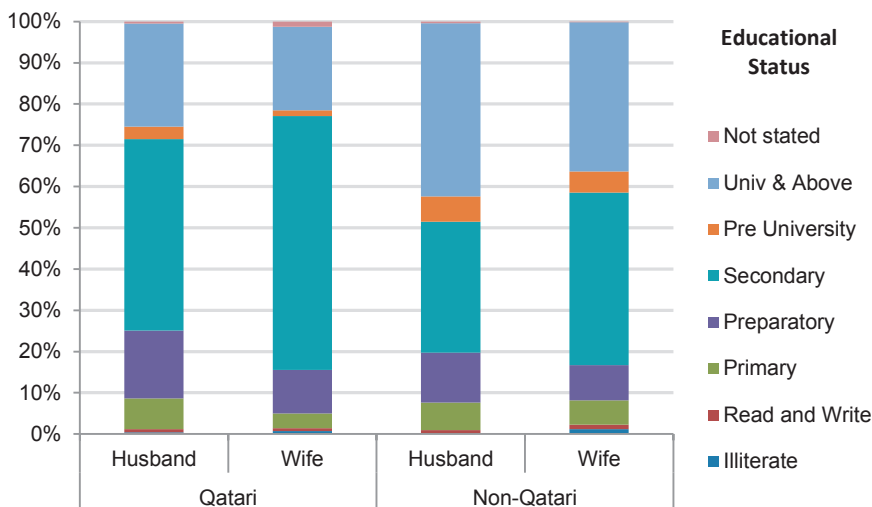

• **Marriages by educational status of spouses**

Graph (7) shows the percentage of marriages by educational status, gender and nationality in 2011. The percentage of marriages for non-Qataris (both females and males) who are graduates or postgraduates is higher than Qataris' whose percentage amounts to 25% of total educational status for Qatari males, whereas it amounts to 42% for the non-Qataris males as well. This is also the case for females: 20.3% for Qataris whereas 36.2% for non-Qatari. The percentage of marriages is higher among non-Qatari university graduates and post-graduates due to getting married at a late age as aforesaid, whereas the Qataris are getting married at an early during university study.

Educational status has a significant role in delaying marriage for the non-Qataris compared to the Qataris.

Graph No.7 Marriages by educational status of spouses, 2011

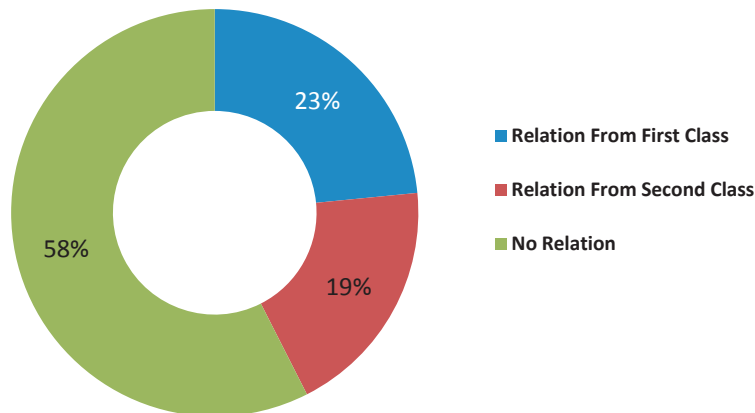

- **Marriages of Qataris according to kinship**

Graph (8) shows that the percentage of consanguineous marriages remains high with 42% among Qataris in 2011 despite the campaigns that were launched to raise awareness about the risks of consanguineous marriage. The marriages of first degree relatives reach 23% and 19% for second-degree relatives'. The percentage of spouses, who are not relatives, attains 58%.

Despite awareness campaigns, consanguineous marriage is still very common among Qataris; it amounts to 42% of total marriages .

Graph No.8

Marriages of Qataris according to kinship, 2011

Second: Divorce

The divorce phenomenon will be tackled through indicators related to divorce rates and factors leading to divorce in the Qatari society, e.g. duration of married life, age of spouses, their educational level and polygamy. The Qatari society witnessed a slump in divorce cases to reach 754 in 2011 among Qataris. The most important divorce indicators are explained as follows

Divorce rate among Qataris decreased 8.0% in 2011 compared to 2010

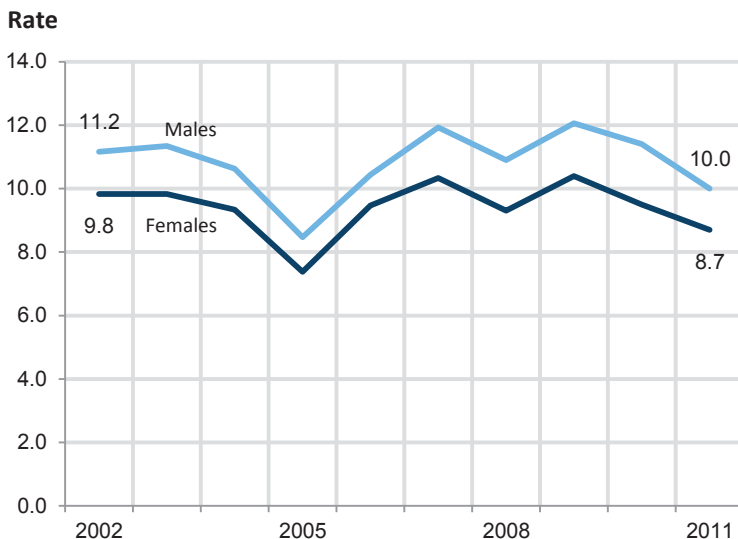

- **General divorce rate per 1000 population Qatari population 15 years & above**

The graph indicates divorce rate decrease among Qatari nationals per 1000 of population during the period 2002-2005. It slumped from 9.8 in 2002 to 7.4 in 2005 for women, whereas it raised once again to reach 8.7 in 2011.

As for men, the divorce rate dropped during 2002-2005. It decreased from 11.2 in 2002 to 8.5 in 2005, whereas the rate increased once again to reach 10.0 in 2011.

Graph No.9

General divorce rate per (1000) population 15 years & above, Qataris, 2002-2011

- **Divorce by nationality of spouses and place of husband's residence**

The most cases of divorce occur in Al-Rayyan Municipality by 44.3% of total divorce cases, followed by Doha municipality with 39.2%, Umm Salal 5.4%, Al-Wakra 5.1% and the rest of municipalities (Al-Khour, Al-Shamal, Al-Dayen) with a percentage of 3.2

Most of Qataris' divorces occurred in Al-Rayyan municipality, whereas most of non-Qataris' ones were in Doha municipality

With regard to divorces according to husband's nationality and place of residence, it is observed that most cases

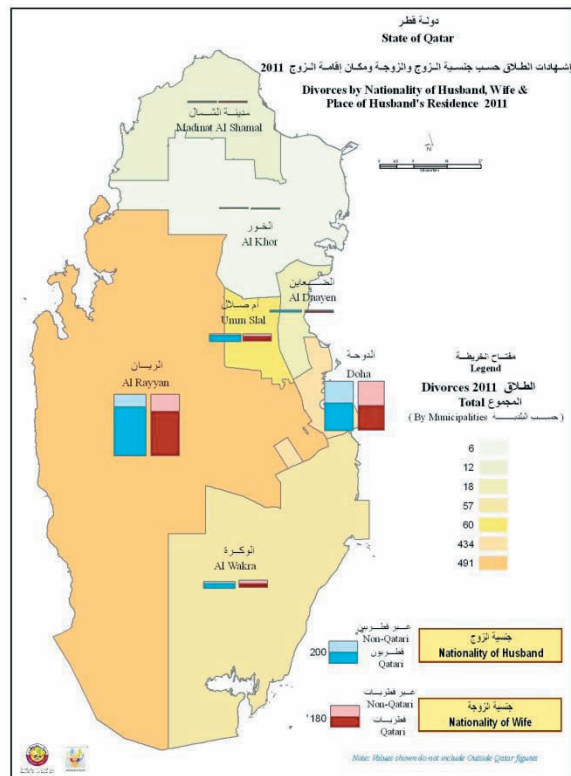

of Qataris' divorces occur in the municipality of Al-Rayyan with 51.7%, followed by Doha 31.8%, Umm Salal 6.6%, Al-Wakra 5.6% and the rest of municipalities (Al-Khour, Al-Shamal and Al-Dayen) with 2.1%.

As for the non-Qataris' divorce cases, they are mostly concentrated in Doha municipality with 54.8%, followed by Al-Rayyan 28.5%, Al-Wakra 4.2%, Umm Salal 2.8% and Al-Khour as well as Al-Dayen municipalities with 1.4%. No divorce cases among non-Qataris have been recorded in Al-Shamal municipality.

Graph (10) shows that the majority of Qatari females' divorces occur in Al-Rayyan municipality 50.8% of the total Qatari females' divorces registered in Qatar, followed by Doha 31.7%, Umm Salal 6.0%, Al-Wakra 4.7% and the other municipalities (Al-Khour, Al-Shamal, Al-Dayen) 3.9%. The percentage of Qatari females' divorces, that occurred abroad, reached 2.9%.

Graph No. (10)

Divorces by nationality of spouses and place of husband's residence, 2011

Most cases of non-Qataris' divorces are basically concentrated in Doha municipality with 51.8% of the total divorces of non-Qatari females, followed by Al-Rayyan 33.3%, Al-Wakra 5.8%, Umm Salal 4.4% and the other municipalities (Al-Khour, Al-Shamal and Al-Dayen) with a percentage of 2.2%.

- Divorces by type of divorce and nationality of spouses**

The results show a rise in “revocable” divorce (The husband may cancel the divorce and return his wife without a new contract) by 48.7%, and minor irrevocable divorce (when the first and second divorce is accomplished)by 42.5%.

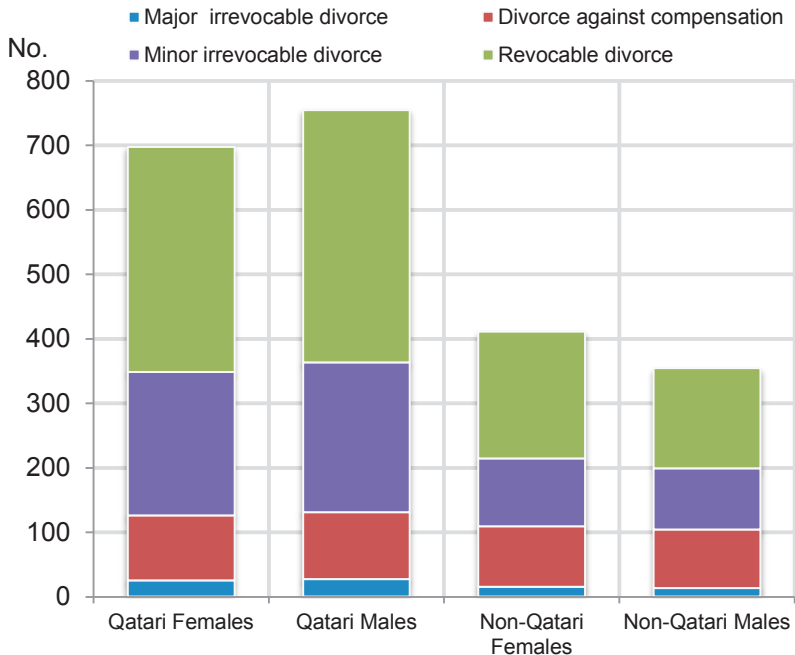

Revocable and minor irrevocable divorce cases represent 91.2% of total types of divorce

The Graph (11) shows a decrease of major irrevocable divorce (the third divorce which is irrevocable except the ex-wife is legitimately married to another one and divorces)by 2.9%, and divorce against compensation (divorce occurs upon the wife’s request in return of an amount of money) by 5.9%.

The Graph (11) explains, in a detailed way, the number of divorces as per type of divorce and nationality of spouses.

Graph No.11

Divorces by type of divorce and nationality of spouses, 2011

• **Divorces by type of divorce and the husband age group**

The Graph (12-a) indicates that divorce cases are higher among Qatari spouses within the age group (20-29); they amount to 37%, and they attain 34.4% for the age group (30-39).

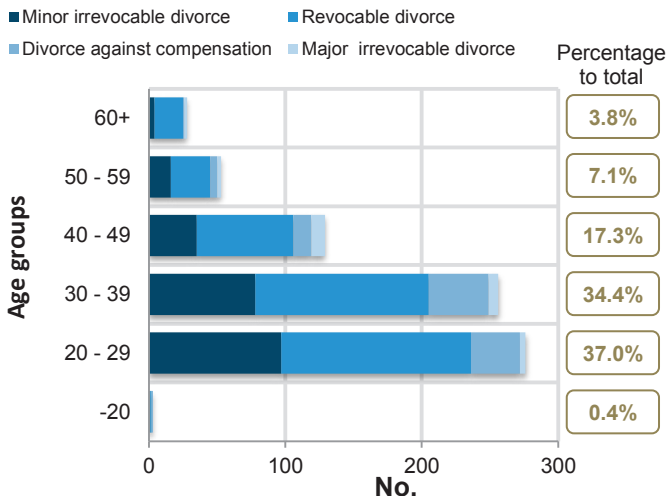

For the age group below 20 years, divorce percentage reaches 0.4% due to the small number of spouses within this age group.

As for the non-Qatari spouses (graph 12-b), the highest percentage of divorce for the age group (30-39) amounts to 47.2% of the total divorces, followed consecutively by the age group (40-49) and 20-29) with a percentage of 16.7 and 22.1 respectively.

The lowest percentage was for the age group (60-above) with 3.3%, no divorce cases were recorded for the age group (20-below) in 2011.

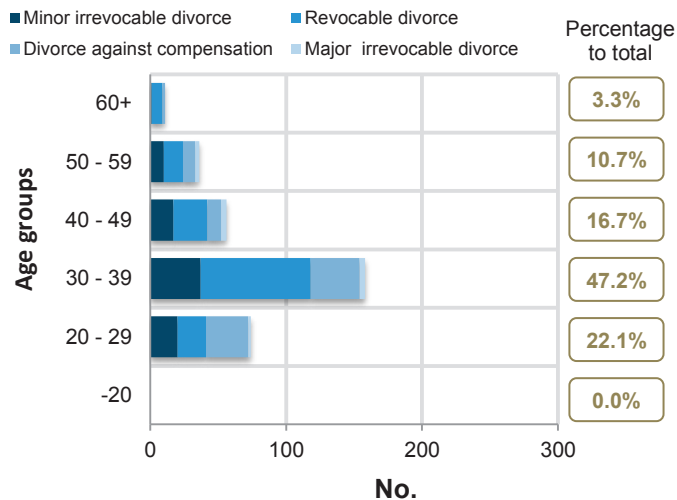

Graph (12-A)

Divorces by type of divorce and husband's age group (Qataris), 2011

Graph (12-B)

Divorces by type of divorce and husband's age group (Non-Qataris), 2011

• *Divorces by type of divorce and the wife's age group*

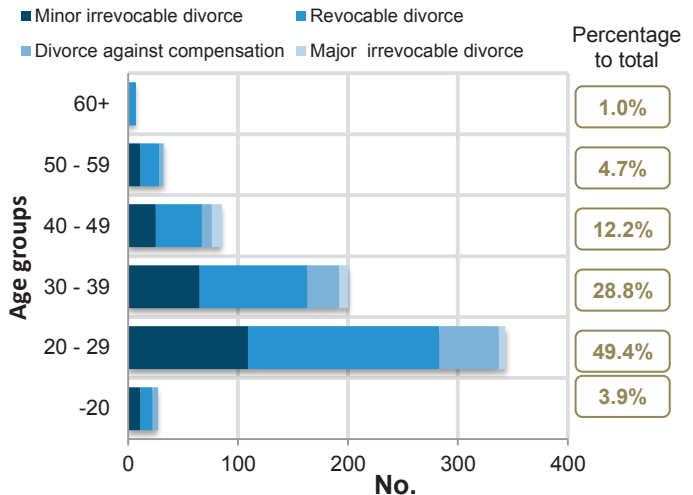

With regard to the Qatari wives, the graph (13-a) shows that the divorce is higher within the age group (20-29); it amounts to 49.4% of total divorces, followed by the age group (30-39) with 28.8%.

The lowest percentage is recorded among the Age group (60-above) with 0.1%.

As for the non-Qatari wives, the highest percentage of divorces is among the age group (20-29); it amounts to 40.8% of the total divorces, followed by the age group (30-39) with 33.6%. The lowest percentage is recorded among the age group (60-above) with 1.6%.

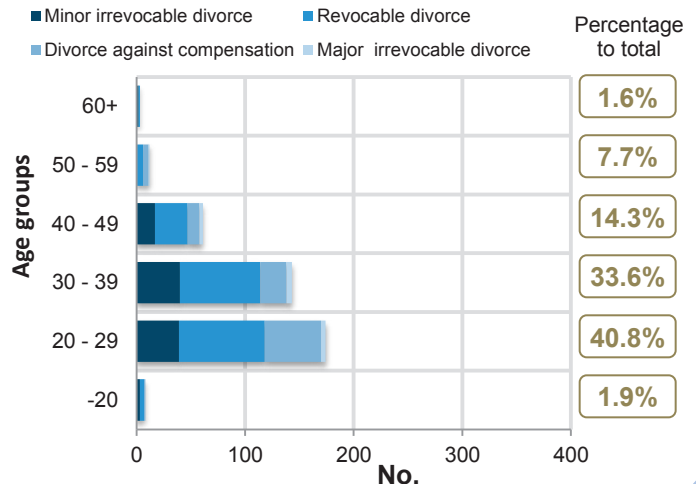

Graph (13-A)

Divorces by type of divorce and wife's age group (Qataris), 2011

Graph (13-B)

Divorces by type of divorce and wife's age group (Non-Qataris), 2011

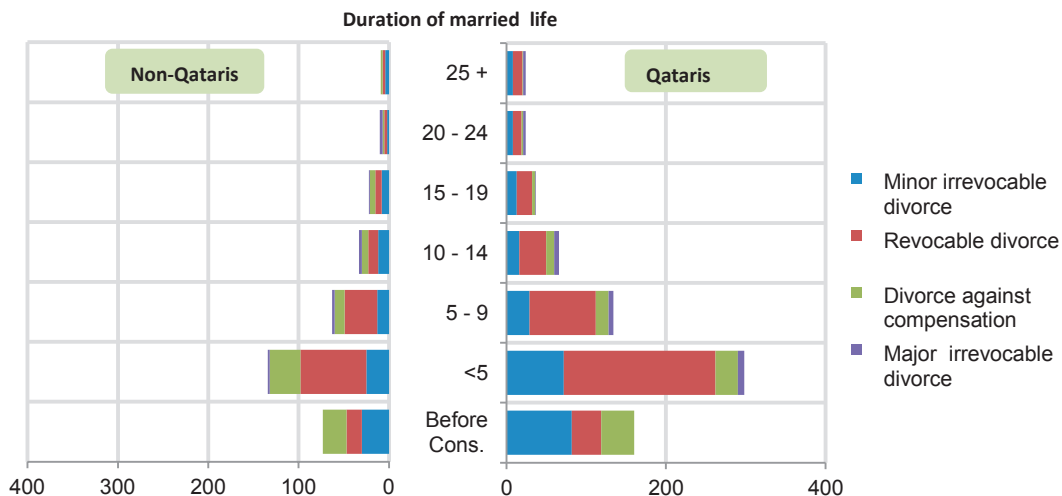

• **Divorces by duration of married life of spouses**

The figure (14-a) indicates that most divorces by duration of spouses' married life in 2011 occurred during the first five years of marriage and before the period of consummation, the fact that accounts for the increase of minor irrevocable marriage and the revocable marriage as previously mentioned.

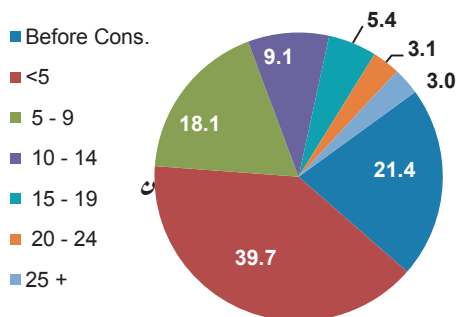

Divorce percentage during the first five years and before consummation constitutes 60% of total divorces by duration of married life. It is observed that the percentage of divorcees whose married life exceeds 20 years is the lowest compared to the total divorces by duration of married life. Besides, the graph (14-a) shows an increase in 2011 in divorcees' percentage whose married life ranges between 5 and 9 years, representing 17.8% of the total divorces – with an increase of 0.7% compared to 2010.

Increase of divorce cases during the first five years of marriage

Graph No. (14-a) **Divorces by type of divorce, duration of married life and nationality of the husband. 2011**

Graph No. (14-b) **Divorces by duration of married life of the wife, 2011**

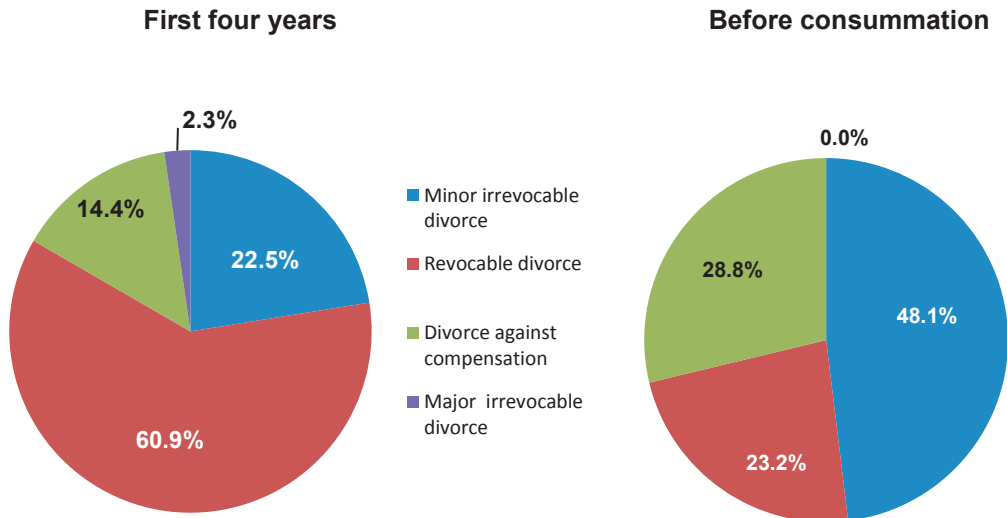

In a more detailed way to the divorces that occur during the first four years of marriage or before consummation, the Graph (15) indicates that 48.1% of divorces that occur before consummation are minor irrevocable divorces, whereas the revocable divorce constitute 23.2%, and divorces against compensation 28.8%, and major irrevocable divorce constitute 0.0% of the total divorces before consummation.

As for first years of marriage, the revocable divorce constitutes the highest percentage of divorce types with 60.9%, while minor irrevocable divorces represent 22.5%. Divorce against compensation and major irrevocable divorce constitute 14.4% and 2.3% respectively.

Regarding the age groups of the divorce which occurs before consummation, the Qatari wives recorded the highest number among the age group (20-24) while the non-Qatari wives' highest number was among the age group (20-29). For Qatari and non-Qatari husbands, the highest divorce percentage was among the age group (25-29). As for the divorce during the first four years of marriage, the highest number of divorcees (Qatari males, Qatari and non-Qatari females) was among the age group (25-29), while the non-Qatari males highest percentage of divorce was among (30-34).

Graph No.15

Divorces by type of divorce during first years of marriage , 2011

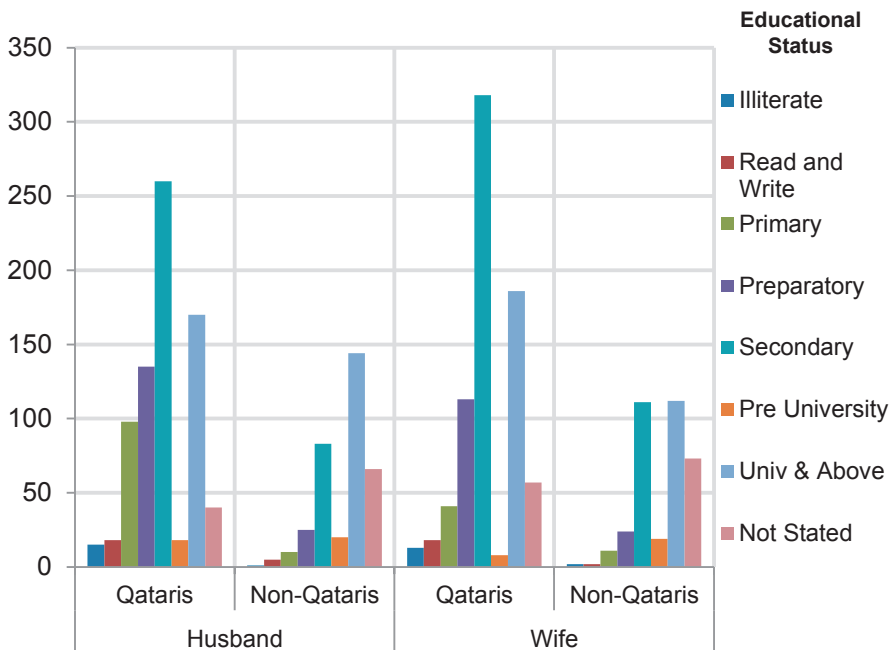

• *Divorces by educational status of spouses*

The graph (16) indicates the educational status of divorcees (males and females). It is clear that the highest percentage of Qatari divorcees is among the high school graduates; 260 cases for Qatari males and 318 for Qatari females.

As for the non-Qatari females, the university graduates category represents the highest number of divorcees, whereas the highest number of non-Qatari male divorcees is recorded among university graduates as well.

Graph No.16 **Divorces by educational status of spouses, 2011**

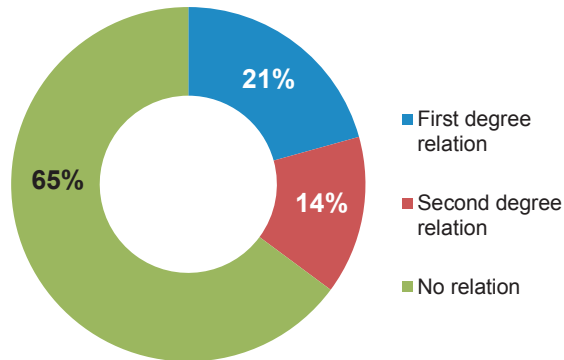

- **Divorces of Qataris according to kinship**

As shown in the figure 17, divorce which occurs among Qataris who have no blood ties represents the highest percentage of divorces (65%), whereas the first degree relative category constitutes 21% of total divorces according to kinship, and second degree relatives represent 14%.

36% of divorce cases occurred among consanguineous spouses

Graph No.17

Divorces of Qataris according to kinship, 2011

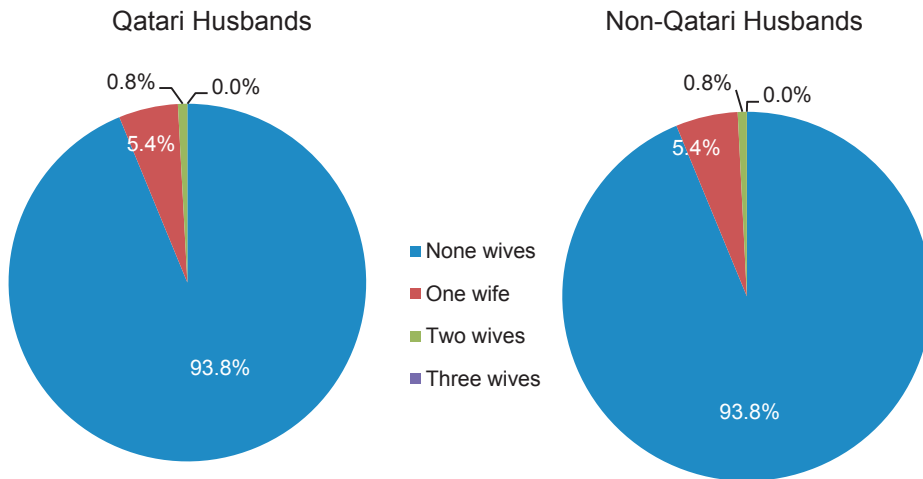

• **Divorces by number of wives still under marriage bond**

The Graph that illustrates divorces according to number of wives still under marriage bond, shows that the majority of divorce cases in 2011, took place among those who have no other wives under marriage bond, reaching 93.8% of total divorce cases for Qatari husbands, followed by those who are still with one wife only, with a ratio of 5.4%. Non-Qatari husbands have almost the same ratios of Qatari husbands.

Graph No.18

Divorces by number of wives still under marriage bond & nationality of husband

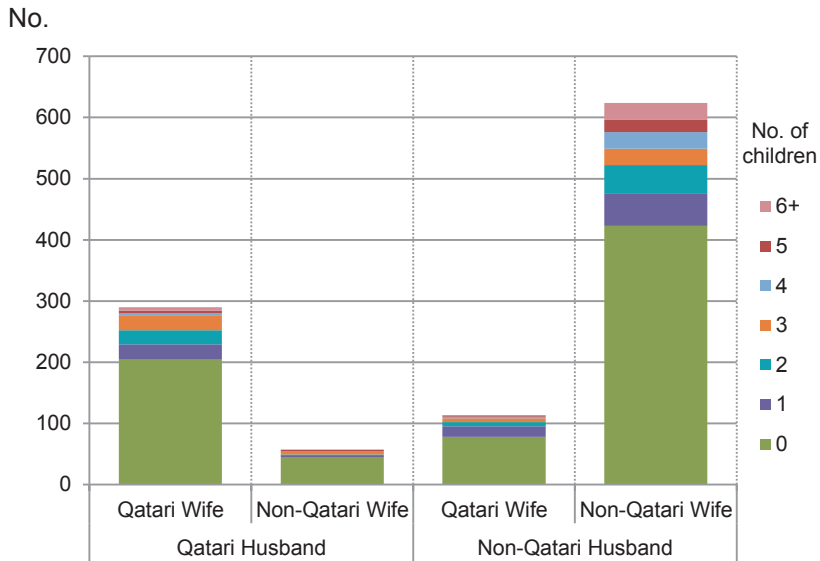

• **Divorces by the number of children and nationality of spouses**

The figure (19) that in 2011 the majority of divorces occurred between spouses that did not have children (69.1% of total divorces by the number of children), followed by spouses with only one child (9%), and spouses with two children (7.2%). This fact is due to the increase of divorce percentage which occurs before consummation and during the first four years as previously mentioned.
